**LAST CALL: Professional Elliottician trading tools will no longer be available to private traders after ~~October 14th~~, 2005
*extended to October 21st***

For as low as \$495 per month, get access to advanced forecasting and trading software and courseware soon only to be available to institutional users for license fees beginning at \$100,000 per year ...

From the Desk of Rich Swannell, Founder Refined Elliott Wave Principle

Monday, 6:25pm

Dear Stock Market Trader,

Last year our published calls - if all acted upon *precisely as and when we called them* had the potential to produce the following trading results:

- **Commodities:** Min profit 86%, Max profit 983%, Average profit 701%
- **ForEx:** Min profit 32%, Max profit 1,215%, Average profit 445%
- **Indexes:** Min profit 8%, Max profit 430%, Average profit 59%
- **Stocks:** Min profit -4% (loss), Max profit 149%, Average profit 13%

Let's view those numbers from another angle:

During 2004 we publicly announced and published 60 calls on a variety of financial markets. Here is what the numbers say:

- **57 out of 60 calls** were profitable
- **The most profitable call returned 1,215% on margin.** In other words, an investment of \$1,000 on this call *resulted in \$12,150 profit ...*

- Of the 3 calls that were not profitable, the worst losing trade was just 4% - or a worst-case loss of just \$40 on a \$1,000 investment.
- ***The average call returned 193% on margin.*** That means that on average, an investment of \$1,000 on each call *resulted in \$1,930 profit.* The average return on margin for ForEx calls was 445% and the average return on margin for calls on ***commodities was a massive 701%.***

LAST CALL ... Would you like to achieve similar trading results?

If you have **just three hours a week...** and you would like to discover how to achieve results like these for yourself ... **then please read on:**

Because the **tools and technology** that made such results possible are moving into the blue-chip institutional world and will *no longer be available to private traders after ~~October 14th, 2005~~ (extended to October 21st).*

Thus this is your LAST CALL and last chance to get your hands on them ...

After 15 years of intensive research and development we have achieved far more than I would have ever imagined possible:

- **Being able to accurately forecast liquid markets with amazing accuracy** (95% of our published calls over the past 2 years have been correct) ...

Thanks to years of number crunching using the computing power of over 3,000 machines strung together in a virtual network which revealed that "common" Elliott Wave patterns are not that common...

They change shape depending on the type of market- commodities, Forex, stocks, indices - and depending on the time frame - over a year versus a day versus an hour.

The result is the world's only pattern recognition database based on millions of real world market movements.

- **Developing the forecasting software and tools that made this possible**, and delivering the same technology to *thousands of traders* allowing them to emulate our forecasting success ...

*Our **Refined Elliott Trader** software compares real*

live data with the millions of possibilities from the database, performs complex statistical calculations presenting you with the most probable outcome for an incomplete pattern.

All without you having to do one single calculation.

This is the software we have used to achieve a 95% rate of accuracy over the past 2 years, and what thousands of traders are now also using ...

- **Creating comprehensive courseware for educating traders on *pattern recognition, forecasting and trading* ...** our Elliottician Certification Course and Advanced Course include over 80 online modules of training complete with audio, video demonstrations, chart examples and self-test evaluations that must be passed in order to progress ...

Almost 1,000 traders have enrolled in the Elliottician Certification Course ... and all graduates passed the 85% or greater forecasting accuracy test . A small sample of their gratifying testimonials are displayed below ...

"The course has fulfilled its every promise..."

"...perhaps as close to the "Holy Grail" of trading as you can reasonably approach. I have proven to myself with a list of verifiable witnesses that claims of 85% accuracy are achievable and a MODEST assessment of performance at that."

-- *Ran Edwards, TN, USA*

"Look no further than yourself and Elliottician"

"By far the most eye-popping information I have ever encountered. I have trained under Jake Bernstein, Ken Roberts, Stanley Kroll, and Larry Williams, all great traders in their own rights.

But for those of you in search of the "Holy Grail" look no further than yourself and Elliottician's "Refined Elliott Wave Principle", "85% Forecasting Phenomenon" and the Refined Elliott Trader software. You will never get any closer than this."

-- *Jerre Stinson, NJ, USA*

"The monthly forecast for the S&P 500 - absolutely amazing..."

"I can say that my investment was absolutely worthwhile. Rich Swannell as instructor is an inspiration! Very good and easy-to-understand explanations and he really is extremely motivated; always a pleasure to learn from him.

The monthly forecast for the S&P 500 - absolutely amazing!! Don't just think about it. You better do it!"

-- *Uwe Paschke, Kelkhiem, Germany*

"Do not hesitate for a micro-second..."

I took my time to be convinced to make sure I have found the best tool to trade with. I am glad I did. The forecasting of this tool is as sure as night follows day no two ways about it."

-- *Isaac Crankson, Streatham Hill, London, UK*

"Based on a scientific system..."

"The Elliottician Certification course gives a real plus value, as it is based on a scientific system."

-- *Ghunald Loyaerts, Tienen, Belgium*

"Don't procrastinate..."

"Don't procrastinate and lose more money in the markets; learn to trade and be a professional at it."

-- *Mayur Shah, London, UK*

[More testimonials from newly self-assured graduates / traders are at the end of this message.]

**LAST CALL ... This is your last chance and last opportunity to boost your trading profits with similar results ... Act before ~~October 14th~~, 2005
*extended to October 21st***

After 15 years of development, our forecasting and trading software tools and courseware - *with their accuracy tested and proven* - have matured ready to move into the blue-chip institutional market ... **And thus you have ONE LAST OPPORTUNITY to add them to your arsenal of profit generating armor because ...**

... After ~~October 14th~~ (extended to October 21st), 2005, they will no longer be available to private traders. Only institutional users - fund managers, brokerage houses and the like

will have access based on yearly license contracts starting at \$100,000 each up to millions of dollars.

The license fee is \$20,000 per seat with a minimum of 5 seats ... many institutions will take 10 seats or more ...

But for the next few days, all Elliottician forecasting and trading tools and courseware are available **at early development stage prices till ~~October 14th~~ (extended to October 21st), 2005 only**. Thereafter they will not be available to private traders at any price.

We are offering major discounted prices for all tools taken as a package ... or you can chose the low monthly payment plan if you wish. Please also note below the special offer to those of you who already own one or more Elliottician trading tools ... but maybe not all of them yet.

[**CLICK HERE to Order NOW...**](#)

The Elliottician forecasting and trading tools on offer are as follows:

Software

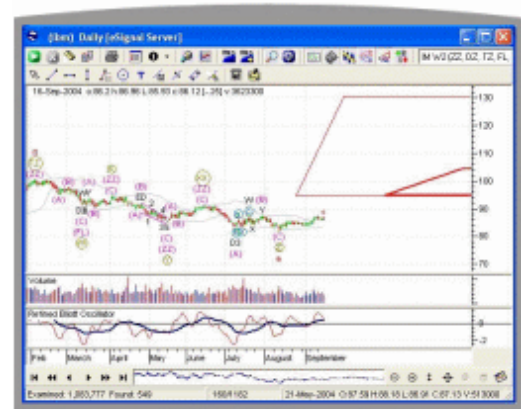

RET Trader Software

The **Refined Elliott Trader (RET)** software - powered by the world's only **pattern recognition database** based on millions of real world market movements - gives you the *exact odds*, or an **exact probability**, of where the markets are likely to move ...

The result of over \$10 million and 15 years of research into the effective application of Elliott Wave - **RET** is used to successfully forecast liquid financial markets such as stocks, currencies, indices and commodities.

In addition, proprietary and applied trading indicators within **RET** may then be used to accurately identify and determine entry and exit points.

[Want more details on why RET Trader Software is so powerfully profitable to traders? Click Here...](#)

Real-time Upgrade

Discover how easy it is to have your Elliott Wave forecasts *automatically updated minute by minute* as the market moves in real time. The **Real Time Upgrade** will give you the ability to bring in live streaming data from eSignal.

You will also be given comprehensive instruction on using the many real-time features found within the RET Trader software.

Technical Indicators and Drawing Tools

Use specially refined technical indicators to compliment your forecasting for even more profitable trading opportunities.

Apply fibonacci, bollinger bands, MacD, moving averages, volume, newsfeeds and candlesticks alongside the **Refined Elliott Wave Principle** to magnify our trading effectiveness. Plus gain access to our proprietary technical indicator - the **Refined Elliott Oscillator** - which will assist in determining trade entry and exits.

Education

Elliottician Certification Course

The **Elliottician Certification Course** will show you a whole new technology of pattern recognition developed by Elliottician over the last 15 years, and now given practical and profit driving power through the **RET Trader software**.

The course shows you step-by-step how we have achieved documented results of accurately prediction market direction at least 85% of the time. In fact, our actual calls have scored a 95% rate of accuracy over the past 2 years.

The ability to forecast how players in the market will act and react will give you the *power to forecast markets* with **awesome precision**. Not every market... obviously. There is a simple test to determine which markets you can forecast and which ones don't conform.

The **S & P 100 stocks... S & P 500 stocks...** A lot of the **NASDAQ stocks**. High volume or very liquid **commodities, currencies, even bonds**. They can all be forecast *with uncanny accuracy* .

The **Elliottician system** is based upon a certain type of **pattern recognition**. It looks for markets that have shown appropriate historical behavior. A number of tests are performed on charts over the past 10 - 15 years to determine whether historically they have shown particular patterns *consistently*. If the market qualifies, then they can *forecast into the future with a high and proven degree of probability*.

These are markets that are subsets of markets that have a lot of traders so you get

crowd psychology with herd instinct happening. Typically they are *very liquid* markets.

[Why are institutions willing to pay \\$20,000 per seat for RET software and certification and advanced courseware? Click here to find out...](#)

Advanced Elliottician Course

In the **Elliottician Certification Course** you discover all you need to know about forecasting the markets. However, forecasting the markets and trading the markets are entirely different things. You can know which way the markets are going to go, but that's no guarantee that you know when to get in and when to get out at the most profitable times.

The **Advanced Elliottician Course** shows you a structured trading process. We have a range of technical indicators we've developed that work very well with Elliott. You'll discover exactly how to use those indicators to be able to enter and exist the market at exactly the right times.

We also cover in detail **money management**, how to develop a **comprehensive trading plan**, and how to apply the proprietary **Refined Elliott Oscillator** plus other technical indicators to determine your trade entry and exit points.

[Why are institutions willing to pay \\$20,000 per seat for RET software and certification and advanced courseware? Click here to find out...](#)

Real Time Course

Day trading live markets is very different to trading end-of-day ... The **Real Time Course** shows you how to apply everything you have learnt in the **Elliottician Certification Course** to real-time online trading ...

... plus get a guided tour on how to use your **RET Trader** software in the day trading environment.

"You make a very complex theory into a piece of cake..."

"Thank you for sharing your pragmatic approach to the Refined Elliot Wave Principle. You make a very complex theory into a piece of cake."

--*Hakan Tezcan, Istanbul, Turkey*

"RET is so good that I wish only a few people knew of it and know how to use it..."

"Outstanding course! I have never believed in anything as much as I believe in the Science of Chaos, fractals, and how the Elliott waves manifest these.

"RET Trader goes a long way in analyzing charts very quickly using refined EW principles and forecasting the market like nothing else I have seen so far.

"RET is so good that, in a selfish sense, I wish only a few people know of it and knew how to use it!"

--*Ashwin Shah, Texas, USA*

"The balance of audio, video, text, and RET exercises were well thought out..."

"The course was extremely well done. The balance of audio, video, text, and RET exercises were well thought out and effective in communicating the material for

comprehension and retention."

--Ken McAfee, USA

"Thank you Rich for awesome clarity in presenting material of this course."

--Piotr Zalewski, UAE

"Just mind-blowing with awesome possibilities."

--Anil Singh, Australia

"... has opened up a whole new ... superior means of forecasting and trading the markets."

"First of all, a big thank you for the course - very professionally prepared and presented.

"Secondly, and from my personal point of view, very important – I have studied Elliott Wave Theory extensively in the past but this is without a doubt the best practical education I have experienced.

"It has improved my understanding of Elliott wave dramatically and for me it has opened up a whole new and I believe time will demonstrate, superior means of forecasting and trading the markets."

--John Richardson, Australia

"Your ... hands-on approach and superb back-up support team have made this course what it is."

"Thanks and congratulations on an excellent course presentation. Your personal and hands-on approach and superb back-up support team have made this course what it is."

--James Paynter, South Africa

"Awesome course! Awesome results! Awesome expectations! Thanks a million..."

--Norman Alderton, USA

"... This is what I've been missing."

"WOW...This is my fourth course on how to trade the FOREX market and this is what I've been missing. I will now be withdrawing money from the FOREX market and NOT depositing."

--Franklin Sanidad Jnr, USA

"... course is very well organized with a good mix of audio, video, documentation (theory) and exercises"

"Thanks again for a great course, this was my first online course and it is very well organized with a good mix of audio, video, documentation (theory) and the exercises were gauged just right to make sure you were awake and alert through the material but not so difficult to get bogged down."

--Brad Loewen, USA

"... an entirely priceless course and material which no trader/investor can do without..."

"Simply amazing, lucid, clear, and to the point. No nonsense, perfect logic, and an entirely priceless course and material which no trader/investor can do without."

--Ananth J Acharya, USA

"Challenging, Enlightening. Well programmed. Excellent support."

Challenging, Enlightening. Well programmed. Excellent support. Hopefully, the opening of the door to a world without end.

--Charles Gervais, Canada

"The holy grail of trading..."

"You have found the Holy Grail of trading. Don't let it pass by."

--Jules Cayer, Connecticut, USA

"RET & certification is the closest thing to a crystal ball..."

"It's almost certain suicide if you go it alone and unarmed into the markets. RET is my Obi-Wan Kenobi. With RET & Certification, you're not only less likely to get blindsided by market action, but you've finally got the closest thing to a crystal ball."

--Sam Bleecker, New Jersey, USA

"It was so clear!!"

"Markets operate with significantly more structure than I ever believed, and having read many Elliott manuals before, I was concerned as to whether I would actually, gain any more clarity from this course...man it was so clear!!"

--*Bryn Griffiths, Wellington, New Zealand*

"Worth into tens of thousands of US\$"

"The dollar value of the information, if applied in real time trading, will by FAR exceed the price of this course. From my (humble) perspective, meaning my investment money isn't that large, I think it would worth into tens of thousands of US\$"

--*K K Sips, Breda, The Netherlands*

"For anyone who wants to be a successful trader, it's an absolute must."

"Cheap at the price you are asking. For anyone who wants to be a successful trader, it's an absolute must."

--*Darwin Harris, Renton, Washington, USA*

"... Premise is the clearest one I have come across in my 7 years of research..."

"I think the premise is the clearest one I have come across in my 7 years of research, I think wave theory is applicable, and I think you have come across a great way to use it with your data base and research."

--*Bruce Bell, New York, New York, USA*

"It has taught me to internalize the way I see patterns..."

"There is much in this course, but the way it has taught me to internalize the way I see patterns, and to understand how forecasts prepared under different time frames can enhance reliability are particularly important. It is well worth the investment."

--*Gregg Richter, Barre, Massachusetts, USA*

"Where before there was darkness, now there is light..."

"I have learnt that it is ALL possible. Plain and simple. The capabilities of my trading are now boundless. Where before there was darkness, now there is light. It is possible to change your life, the lives of those around you and the lives of those you don't even know through the proper application of this technology."

--Trevor Cowie, Winnipeg, Manitoba, Canada

"I would strongly and unhesitatingly encourage anyone..."

"Understanding that the validity of different counts was a matter of probability gave me the ability to commit to choices. In the past, I was paralyzed by a lack of criteria with which to choose, even tentatively, between different counts.

"I would strongly and unhesitatingly encourage anyone who wants to, and will, commit the time and attention necessary to succeed at what ever scale of trading they wish to undertake, to enroll in this program."

--Bob Tajima, Junction City, California, USA

"Become hugely successful at trading..."

"I believe that anyone who seriously studies and learns this method can become HUGELY successful at trading."

--George Stone, North Carolina, USA

"The evidence is compelling..."

"The course is comprehensive, makes sense, and the evidence is very compelling."

--James Sutherland, Sydney, NSW, Australia

"The best investment I've made in all 31 years of my life..."

"It's the best investment I've made in all 31 years of my life. No other trading system comes close to it. It's worth every penny if not more."

--Philip Rodgers, New York, USA

"I am very confident in my trading..."

"Before I was part of the uninformed crowd that lost a fortune in trading stocks. After devoted studying of technical analysis, the Elliott Wave Principle, and the great help of the RET, I am very confident in my trading."

--George Hinis, Cyprus

"It identifies risk..."

"I am very pleased with your responsiveness. Not only is the RET outstanding, but your service is delightful! I have been using the software for a few months now and I am impressed with the ability to identify risk. The tool is very well designed, easy to learn, and very accurate."

--Jim Hoskins, USA

"Superior technical analysis..."

"The product uses superior technical analysis software. It's an all in one product. It's simple to use, even for a beginner."

--Jonathan Ravelas, Muntinlupa City, Philippines

"Best investment in my life..."

It is, so far, the best investment I have made in my life."

--Filip Maricak, Zagreb, Croatia

"If you're serious about Elliott..."

"If you are serious about using Elliott you must consider this course."

--John Mueller, Nevada, USA

"The product is brilliant..."

"For a dedicated Elliott fan the product is brilliant. As far as I am concerned it has brought the understanding and use of Elliott within the grasp of a simple soul. I certainly now have a better understanding of Elliott Wave."

--John Darlison, Hereford, UK

"Move the trading odds in your favor..."

"If one is already well-versed in the Elliott Wave Principle, the tools and clarifications offered in the Elliottician Certification course should move the trading odds in your favor far more than the cost of the course itself.

"If one is new to the Elliott Wave Principle, the potential benefits from undertaking this course are enormous."

--Pat Kenny, Hoppers Crossing, VIC, Australia

"Elliott waves really exist yielding an 85%+ forecast rate..."

"Elliott waves themselves, the histograms, the wave structure, that these patterns REALLY exist and repeat themselves over and over yielding an 85%+ forecast rate... that's amazing!!!"

--Chris McCombs, Canada

"Elliottician certification the best trading education..."

"The Elliottician Certification is far the best from what I have already done for my trading education. (And I have done a lot)."

--Nikolaos Sklias, Athens, Greece

How and why pattern recognition works to provide your trading profits with a boost...

How You Can Use Crowd Behavior to Forecast Financial Markets

How many times have you been frustrated by trading losses? How often have you bought a stock, commodity or Forex, only to see it head in the opposite direction to what you hoped?

If this is your experience, we have good news for you...

What if we told you that certain stocks, commodities, futures, indices and currencies react to crowd psychology... **would you believe us?**

If you could see clear evidence showing you exactly which equities have conformed to this behavior in the past, would that convince you that you might be on to something big? **Would you want to know more about it?**

How would you like to learn a practical, easy to use, trading technique that will turn you into a highly profitable, world-class trader?

Elliottician is dedicated to helping traders achieve consistent success.

Let us explain...

Imagine, for a moment, that you are in a large football stadium with 100,000 other stock market traders. Everyone is watching the scoreboard as the price of a particular stock moves down. Then, as you watch, the price starts to rise.

All around you, traders are observing the same price movement. Throughout the stadium are short-term, medium-term, and long-term traders. There are private traders, technical traders, fundamental traders, institutional traders, traders who want to buy, traders who are holding, traders who want to sell, and traders who are not in the market all - the whole gamut.

And as the price starts to move upwards, different traders react in different ways. Some immediately get on their cell phone and call their broker. Other traders wait and see, while others are not even interested.

As the price continues to move up, many traders within the crowd will place orders with their brokers. All traders are watching the same price movement, but there are many

different reactions.

It is impossible to predict what a single trader in the stadium is going to do, but quite easy to predict the actions of a crowd.

You start to notice that the action of the traders affects the price. And then the traders react to that new change in price - the very same change that they inadvertently created. And so the cycle continues...

The net result is price movement that moves in patterns - regular, definable, predictable patterns.

Now, admittedly there is no stadium of 100,000 traders. But the traders are real enough. They are spread around the world in homes and offices watching their computer screens as the prices change. The result is the same - wherever there is a crowd of traders watching the same price movement, there will be the same price patterns - the result of crowd behavior - the result of mass human psychology.

We at Elliottician have the ability to identify patterns caused by the impact of a crowd trading the same market.

Most liquid markets (those traded or directly affected by a large crowd of traders, such as Microsoft shares or the S&P500 Index) are very predictable to those of us that understand this forecasting technology.

Remember, although it is nearly impossible to determine what a single trader will do, it is statistically possible to determine the probability of what a large crowd will do.

If you are able to understand the effect a large crowd will have on a liquid market, you have the ability to accurately predict its direction. It's that simple.

For many years we have been developing the world's first and only database of its type that measures the impact that crowds of traders have on stock and commodity markets. This has been a lifelong quest and one that we now wish to share with you.

This is no theoretical exercise - for years we have had the help of thousands of people who have donated their unused computer time to help in the analysis of millions of charts from the world's most traded markets.

Proprietary Research

Just like a weather forecast, our Elliott Wave Pattern Recognition technology gives you the exact probability of the market reaching a given price by a given time. Although it doesn't tell you what to buy or sell, or when, it does give you incredibly valuable information that you can use to make your own trading system more profitable.

Imagine knowing that your favorite stock has an 81% chance of rising 50% in the next 7 days.

For example, imagine knowing that your favorite stock has an 81% chance of rising 50% in the next 7 days. Compare this to the weather forecast metaphor - such as knowing that there is an 81% chance of strong winds today. With such information, you could decide whether to pull out your kite, go sailing or simply stay indoors. It is your decision entirely what you do with this information - it simply allows you to make better, more informed, choices.

When applied to the stock markets, this valuable information enables you to take more money out of the market, regardless of your trading system.

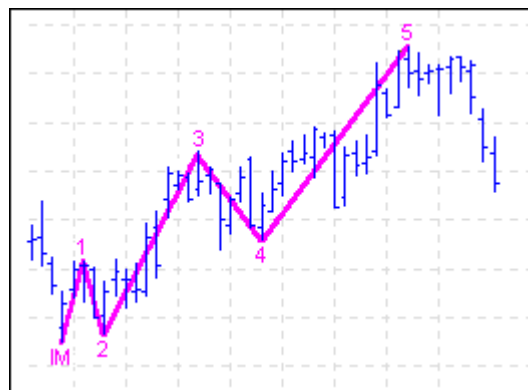

Most of our clients use Elliott Wave Pattern Recognition technology as an additional indicator to their favorite trading system - to make their existing trading system significantly more profitable.

How Elliott Wave Pattern Recognition is used to forecast the markets

When a large number of traders are watching the same price of a given market, they tend to act in predictable ways - similar to a herd instinct. The human psychology translates into remarkably predictable price movements, or patterns.

Using pattern recognition to forecast the market is simply a matter of identifying the beginning of a common price pattern, then determining where the pattern is most likely to complete.

Here is an example:

A typical Elliott Wave "Impulse" Pattern

The figure above represents a five-wave ascending "Impulse" pattern (highlighted in magenta) - one of a dozen fundamental Elliott Wave patterns.

An Impulse pattern moves in the direction of the underlying trend and is made up of five waves, or moves. Each wave is labeled at its endpoint. The Elliott Wave Principle identifies an Impulse wave when:

1. Wave 2 does not fall below the starting price of wave 1.
2. Wave 3 is not the shortest wave by price movement when compared to wave 1 and wave 5.
3. Wave 4 does not overlap the range of wave 1.

Once this 5 wave pattern is complete, the market will generally retrace (drop back in price) somewhere between 1% and 100% of its climb, before continuing with the larger trend. As you can see in the above example, the retracement has already started at the far right of the chart.

How the exact probabilities are determined

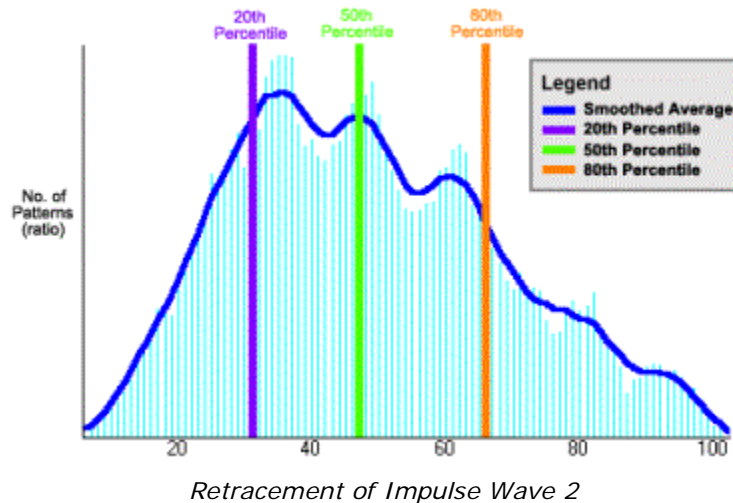

Once a pattern has been identified, as demonstrated in the above diagram, the next and most important question is: "Where is the market likely to be when the pattern completes?"

To answer this, we set out to examine a large number of such patterns with the aim of determining, by statistical analysis, where the patterns most often completed.

Because pattern recognition takes a large amount of computing power, we created a screen saver to do the work. Thousands of people have donated their unused computer time for several years, resulting in the establishment of the world's largest Elliott Wave database.

Our database has yielded secrets about the market that have never before been available to traders.

Below you can see the results of the analysis of the millions of Elliott Wave patterns found in our Elliott Wave Database. When every 5-step Impulsive pattern of this type in our Elliott Wave database is examined, and the frequency of retracement between 1% and 100% is graphed, we find results that look like this:

As you can see from this frequency histogram, the most common retracement is about 38%, followed by 50%, and then 62%.

Note also that 60% of patterns retrace between about 32% and 65% of the initial five-wave price movement before changing direction and resuming their upward movement.

In addition, we have discovered patterns retrace by different amounts (on average) depending on the type of market, the time frame and the orientation. I.e., Patterns covering a small time frame, such as minutes or hours, will behave quite differently to patterns covering months or years.

If you were trading the market in the example above, you can know the exact probability of the market retracing to a given price before changing direction to the upside.

In a similar way, the timing of this change in direction can also be calculated using our New Elliott Wave Pattern Recognition technology.

Question: So what does this mean for you?

Answer: Speculation is now a thing of the past.

It's a fact: 95% of traders lose money, 3% break even, and the other 2% make all the money, and more, than the 95% lose combined.

Which crowd do you want to follow?

"I was part of the uniformed crowd that lost a fortune in trading stocks. After devoted study of technical analysis, the Elliott Wave principle, and with the great help of the [Refined Elliott Trader], I am very confident in my trading."

George Hinis, Cyprus

We have personally purchased, dissected and studied nearly every trading system obtainable. We have spent a fortune purchasing trading systems, and years of computer programming to determine each one's profitability.

Why?

So that neither you nor we ever have to suffer the losses and frustrations again.

We have found that many trading systems can show consistent theoretical profits, but fail to perform when applied to real markets.

We have now been researching and developing the Elliott Wave method of price pattern recognition for more than a decade now - a trading technology that can help you eliminate the frustrations and losses that many traders face every day.

Being a Certified Elliottician can help make trading a lot more profitable for you.

Forecasting the markets has never been this accurate...

Yes, there is some effort involved in mastering this forecasting and trading skill, but like anything in life you only get out what you put in.

Our development team are constantly working to refine and improve the systems that we ourselves use to forecast and trade the markets - so that you can enjoy the success that we are enjoying.

You see, when you become a Certified Elliottician, you have a rare trading advantage. You are using a trading technology that is improving every day. The software and support that you have is constantly gathering real time information, cataloguing and analyzing data supplied from traders around the world - resulting in constant and continuous improvements to our forecasting system.

Why is this important you may ask?

Armed with our up-to-date information, you will be able to continually improve the accuracy of your forecasts, and achieve even greater success extracting money from the markets.

The long term effect of this is that you'll be able to enjoy the things in life that matter the most to you, as opposed to worrying about how to make ends meet.

Here's what one of our clients said recently: *"Elliott Wave has changed the way I invest. By finding securities with high Elliott Wave scores, coupled with technical analysis, the number of profitable trades I've made has more than doubled! I've become a more interested, focussed and successful trader! This has helped me select trades with higher probability of profit."*

Al Biddinger, USA

What is the Refined Elliott Wave Principle? Why it has been responsible for our 95% accuracy rate in making calls over the past 2 years...

Since 1994, **Elliottician** has undertaken groundbreaking research into the **real-life application of traditional Elliott Wave theory**. This research expands on the works of both Ralph Nelson Elliott during the late 1920s and of Robert Prechter of Elliott Wave International, author of Conquer the Crash.

In mid 2003, after many years of extensive experimentation, Elliottician made a **breakthrough discovery**. We discovered that certain techniques, when applied consistently, produced far superior forecasting results - accurately forecasting market direction over 85% of the time... These breakthrough techniques are called the "**Refined Elliott Wave Principle**" - a **major discovery** and advance upon original Elliott Wave theory.

Using the computing power of more than 3,000 machines, Elliottician has carried out comprehensive research on the original Elliott Wave theory.

The Elliottician research team compiled the world's largest ever database of **real market Elliott Wave patterns**. For the first time since R.N. Elliott discovered the Elliott Wave principle, computer power has been used to comprehensively and statistically analyze hundreds of thousands of charts and millions of Elliott Wave patterns.

For the most part, the research has validated the original Elliott Wave theory. However, there have been some surprising and valuable discoveries that have lead to more accurate and reliable forecasting than ever before. The result is a cleaner more "**Refined**" Elliott Wave Principle.

For example, pattern differences between exchanges and countries have now been thoroughly documented, so that the software can tweak its pattern recognition depending on the particular market being analyzed.

The result - a progressively more accurate forecasting system, superior to anything ever seen in technical analysis.

Armed with the comprehensive statistics available in our Elliott Wave pattern database, the Elliottician research team developed the **Refined Elliott Trader software**.

As you can read about in the next section, the **Refined Elliott Trader** software package helps you identify patterns within price data. When it finds an incomplete pattern, it gives you exact odds, or an exact probability, of where the market is about to move. It's like a weather forecast for the markets.

The Refined Elliott Trader software proven results ... and how these will impact your day-to-day forecasting and trading the markets...

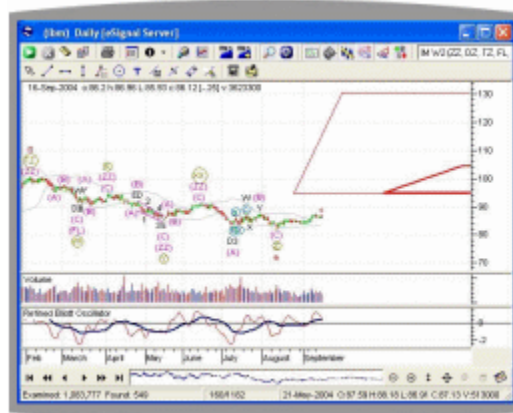

RET Trader Software

The **Refined Elliott Trader (RET) software** - powered by the world's only **pattern recognition database** based on millions of real world market movements - gives you the exact odds, or an **exact probability**, of where the markets are likely to move ...

The result of over \$10 million and 15 years of research into the effective application of Elliott Wave - **RET** is used to successfully forecast liquid financial markets such as stocks, currencies, indices and commodities.

In addition, proprietary and applied trading indicators within **RET** may then be used to accurately identify and determine entry and exit points.

RET is designed to drastically improve trading performance for institutional fund managers through to private traders and investors.

RET is used to successfully forecast liquid financial markets such as stocks, currencies, indices and commodities. Proprietary and applied trading indicators within **RET** may then be used to determine entry and exit points.

The **Refined Elliott Trader** software package helps you identify patterns within price data. When it finds an incomplete pattern, it gives you exact odds, or an exact probability, of where the market is about to move. It's like a weather forecast for the markets.

The Refined Elliott Trader software fulfils two roles:

1. Market Forecasting - RET provides exact probabilities of market direction...

The **Elliottician Certification Course** shows you how to forecast stock market direction with a minimum 85% degree of accuracy ... that is the minimum standard required to be a Certified Graduate of the course.

2. Trading Indicator Application - correct application of RET determines trading

entry and exit points...

The **Advanced Elliottician Certification** course shows you how to accurately identify market entry and exit points through the use of proprietary and applied indicators specific to **RET**.

RET Trader is a proven performer...

RET Trader is the technology we use to achieved a **95% accuracy in our 2004 calendar year calls**. It uses historical market data, not theory to generate its forecasts. It then provides forecasts with a statistical probability of occurring with price and time completion.

What RET is not...

- **RET is not** a get rich quick scheme...
- **RET is not** a trading plan in itself but a key ingredient with which to base a robust trading plan upon. It will give your trading plan a competitive edge.
- **RET will not** make your trading decisions for you but if used properly will provide you with exact odds, as to market direction, and the proprietary and applied trading indicators will assist you to determine optimal entry and exit points for you to incorporate within a trading plan.

What will the RET Trader software do for you...

- The database that powers **RET Trader software** is "**the Google of financial market data**" and it works on real market data not theoretical pattern movements - which will allow you to perform *instant analysis with unmatched accuracy...*
- **RET** takes the enormous complexities of the financial markets and filters them down to a **scientifically sound forecast of the most probably completion of a pattern** in the market with regards to *time and price...*
- **RET is responsible for our publicly proven track record of a 95% rate of accuracy** with all calls made over the past two years. Use RET and our other courseware to learn to emulate our performance...
- **RET** provides actual forecasts with statistical probabilities of price and time target completions ... giving you more accurate trading entry and exits which will ultimately lead to an *increase in your trading profits...*
- **RET works equally well with equities, indices, Forex and futures...**

How does RET work?

Refined Elliott Trader - Forecasting Many financial markets consist of self-repeating patterns in price movements that are regular, definable and predictable.

It is impossible to predict what any single trader may do in a market, but it is possible to predict the actions of a crowd in any given market. Wherever there is a crowd of traders watching the same price movements, there will - as the result of **crowd behavior** - be reflective price patterns working in cyclical fashions. This is the result of mass human psychology.

The team at **Elliottician** have compiled the **world's largest global (price & time) Elliott Wave pattern database** in order to analyze this crowd behavior phenomenon. This database utilizes the phenomenal processing power of **over 3000 computers** across

the globe to **constantly update and analyze these cyclical patterns to forecast market direction**. This technology can be applied to any liquid stock, currency, index or commodity.

The **Refined Elliott Trader** compares current pricing activity against millions of possible scenarios documented in our database. It then bases its forecast upon the most likely outcomes.

Utilizing this technology you are able to analyze market patterns over numerous time periods with different selected pattern counts in order to identify the relevant pattern combinations, upon which, you may apply a forecast with a high level of confidence.

Importantly, through the use of such powerful processing power we have been able to discover how **certain patterns consolidate faster in different markets** and how **similar markets change country by country** due to differences in human psychology within each market.

Refined Elliott Trader - Trading

The trading component of **Refined Elliott Trader** trading system utilizes proprietary and applied indicators fine tuned to the Refined Elliott Wave Principle that we have developed. With correct application, these indicators will help you determine trading entry and exit points with a high level of confidence.

The **Advanced Elliottician Certification** course teaches you how to trade, from the application of trading psychology, through to money management techniques, how to identify tradable opportunities, the different types of stock markets, how to apply trading strategies, and more.

Graduates who complete this course, through the use of our proprietary indicators, are able to accurately identify stock market entry and exit points with a high level of confidence. Graduates also learn how to apply other trading indicators that have proven complementary to **RET** such as Fibonacci, MACD and Candlesticks.

RET TRADER COMPATIBLE DATA PROVIDERS

End of Day data access: Note: For End of Day Data you will need to sign-up for data directly with a compatible data provider.

Forecasting taken to a new level with Elliottician Certification Course...

Elliottician Certification Course

(Forecasting and Trading)

The **Elliottician Certification Course** will show you a whole new technology of pattern recognition developed by Elliottician over the last 15 years, and now given practical and profit driving power through the **RET Trader software**.

The course shows you step-by-step how we have achieved documented results of accurately prediction market direction at least 85% of the time. In fact, our actual calls have scored a 95% rate of accuracy over the past 2 years.

The **Elliottician Certification Course** is an online training course. You learn at your own pace at times that suit you from your own computer.

It consists of **60 modules within 3 sections**. There are multiple-choice tests at the end of each section. It is a comprehensive course that ensures you develop the necessary skills to achieve real results in live market situations.

Elliottician Certification

Module 4

HOW TO USE THE REFINED ELLIOTT WAVE PRINCIPLE

1. INTRODUCTION

Overview of the Research - Introduction

As with all the media files in this course, you can either play them immediately by clicking on the link, or you can save them to your computer first (if for example, your connection speed is too slow) by right-clicking on the link and selecting "Save Target As...". Then save the file to a folder for later retrieval.

Rich Swannell
Course Instructor

Right click here and select "Save Target As..."

{view transcript}

The online training includes a balance of audio, video, text and RET Trader software exercises. The three sections are as follows:

Section 1 - Elliott Wave Principles Methods behind our research practice & the results. Provides a theoretical and practical knowledge base to understand key principals

Section 2 - Software Tools Generation of market forecasts with pinpoint accuracy. Teaches you how to generate accurate market forecasts

Section 3 - The Refined Elliott Wave Principle. Real market application and case studies. Forecast market direction with an 85% degree of forecasting accuracy on your final test.

Here's a quick review of what you will learn:

- Step-by-step secrets on how we achieved documented results of **accurately predicting marketing direction at least 85% of the time...**
- How you can quickly identify the most reliable Elliott Wave price patterns that you can use to **generate MASSIVE TRADING PROFITS** when trading either stocks or commodities...
- How you can easily determine which markets can be traded profitably, and which cannot. This could **ELIMINATE MOST OF YOUR LOSSES**, right there... Period.
- How to quickly determine your **EXACT probability of success**, in any trading situation, so that you can *find winning trades more easily*.
- Which commonly held beliefs about the Elliott Wave Principle are wrong, myths, and how to never make the mistake of using price patterns that don't work. **This can save you a fortune** when trading the markets.
- How to identify price patterns instantly, without effort, without thinking, and be correct nearly every time, so that you can **see profitable trades in an instant**. You'll marvel at the effectiveness of our exclusive method of learning this, within minutes.
- **How to know when to enter the market** and when not to. It is one thing to recognize a price pattern; it is quite another thing to know when to enter the market. Our simple-to-implement strategies can **significantly boost your trading profits...**
- How to use our exclusive Elliott Pattern Recognition knowledge to **maximize your profits by not exiting before the run is over**. Most traders throw profits away by exiting too soon. We give you direct access to our massive Elliott Wave pattern database that will allow you to easily and quickly **determine the most profitable time to exit a market**.

Plus, you'll also receive....

- 60 modules with copious trading examples to learn from and use in your own trading. Each has proven itself consistently and highly profitable, and can be harnessed to perform **trading miracles** for you, too.
- You get direct access to the **world's largest** (and probably the only) **Elliott Wave pattern database** ever compiled.
- ...exhaustive statistical analysis has uncovered startling new insights into the way the world's financial markets move. These are "**cutting edge**" **discoveries**. They are entirely new and unique. And you can use each one to *massively increase your trading profits* - every day!
- The **Elliottician Certification Course** has explanations, illustrations, case studies, actual trading models and software that gives you **direct access to Elliottician's Elliott Research Database** which you can use immediately. It has been designed it to be completely user friendly.

Blow-by-Blow Description of the Elliottician Certification Course

This course is extremely extensive... here is a summary of what you will get:

Module 1 - Starting With The End In Mind: A six-part video series showing you how Rich Swannell forecasts markets with uncanny precision using the **RET Trader** software. You see **the end result**, what our Certified Elliotticians are doing to achieve greater than 85% accuracy on forecasting market direction.

Module 2 - The Ultimate Vision: How and why Rich developed the course... The potential the system provides you to take your life to another level, and how you can ultimately benefit beyond anything you have ever thought of. WHY it is vitally important to be successful and encourage you to think about what you will do with the fruits of your success. You will profit from Rich's own amazing story including his goal of helping 1,000 people become millionaire traders.

Module 3 - Overview of the Research: Renowned Elliottician trader and entrepreneur, Stephen Pierce interviews Rich Swannell: Topics covered include: **Elliott Waves**, the **Refined Elliott Wave Principle** and how the **application of this amazing research** is very important for the future.

Why Elliotticians in the past have clashed over their analysis... and **how the Refined Elliott Wave Principle dispels many of the myths** about Elliott Waves. More importantly, there is a detailed discourse on how Elliott Wave truths have been indisputably proven by new research which is built into the Elliottician forecasting system.

Module 4 - How to Use the Refined Elliott Wave Principle in Your Trading: Ever since Ralph Elliott observed and defined the various Elliott Wave patterns back in the 1940's, Elliotticians have known that the consequences of emotions as they play out in the market are far from random. Module 4 introduces the scientific method of determining every facet of the Elliott Wave Principle.

Many people are aware of how Fibonacci ratios apply to wave structures, but not the

precise probability of markets turning at the various Fibonacci levels...until now... No more opinions. No more conjectures. No more arguments. Just facts based on verifiable statistics and data.

Module 5 - Moving with the Trend: Understanding Impulsive Elliott Wave

Patterns: This module introduces you to the most well known group of Elliott Wave patterns, the Impulsives. Early recognition of an impulsive pattern means massive profits. You will be buying when the professionals buy, not when the moms and dads are buying at the end of the trend.

Module 6 - Moving Sharply Against The Trend: Understanding Sharp Elliott Wave Corrective patterns. There are various types of corrective patterns that are categorized by the Refined Elliott Wave Principle. How is this useful to you? Well you can trade these patterns for profit just like an impulsive pattern. But recognizing when these patterns conclude can put you in a position to trade the next wave of an impulsive pattern from a low risk, high probability entry point. And that is where the greatest profits lie.

Module 7 - Meandering Against the Trend: Understanding Sideways Elliott Wave Corrective patterns. Module 7 details the next family of corrective patterns, known as Flats. Contrasting with the Zig-Zags, which move sharply against the trend, Flats move more sideways. As with all Elliott Wave patterns, profit is achievable by identifying the first wave or two and forecasting the time and price move of the following wave.

Module 8 - Moving in Triangles: Understanding Elliott Wave Triangle formations. This is the last family of corrective patterns. Triangles are often labeled by non Elliott Wave technicians as a triangle or a pennant. But there is a difference... Learn how to analyze these patterns in the context of the overall Refined Elliott Wave Principle and how to calculate the exact probabilities of the next wave in terms of price and time. That's a huge advantage over standard technical analysis that will show up on the bottom line of your trading statement as profit that you never thought possible.

Module 9 - Memorizing Elliott Wave Rules: How to easily memorize the fundamental rules of each common Elliott Wave pattern. Memorizing the most important rules and the most common shapes of the seven most frequent Elliott Wave patterns will make you a lot of money in the financial markets of the world. In module 9, you start to cement in your subconscious all the rules you need to know to profit massively!

Module 10 - Identifying Elliott Wave Patterns in real markets: How to quickly identify real life Elliott Wave patterns when scanning charts. In total, there are 11 Elliott Wave patterns. But of those 11 patterns, only 7 appear frequently enough in the world's markets to form a trading plan around. Do you know which 7 patterns these are? Another surprise revealed by the research is that the shape of some of the patterns is different than previously thought. Module 10 is the next step in training your mind to see the patterns instinctively.

Module 11 - Elliottician Speed Test (Beginner Level): Now is the time to have some fun while you learn to recognize the patterns quickly, confidently and without thinking. The Elliottician Speed Test will assist you to instantly recognize the various Elliott Wave patterns, which is imperative to your success. The Elliottician Speed Test transfers this knowledge from your left brain to your right brain - so that you can easily and instantaneously see Elliott Waves immediately when examining a chart at anytime in the future.

Module 12 - Tidying Up a Few Loose Ends Before Getting Practical: Detailing the few remaining items to round your knowledge and skills to the level you will need to become proficient in picking high profit trades instantly. Did you know that Elliott Wave patterns appear in all time frames, from intraday charts, right through to patterns that may last for several decades, or more? These, along with a few other related topics are covered in module 12.

Module 13 - The Power of Patterns to Predict: An interview that will give you unique insight into what is happening in the minds of the traders as the market moves through the various Elliott Wave patterns. Listen to an amazing interview between Anthony Robbins and Robert Prechter.

Have you ever wondered why repeatable patterns appear everywhere in the worlds financial markets?

Robert Prechter is perhaps the best-known exponent of Elliott Wave Principle as well as a qualified psychologist. In this interview he discusses topics such as: mass psychology, social trends, the Fibonacci sequence and fractal patterns. Robert reveals why these patterns form and who is buying and selling in the various waves. You will begin to see the logic behind the wave structure of markets.

Module 14 - Examining the Evidence: A detailed look at how we have achieved our excellent forecasting results in the past, and how to apply the same principles to your trading. Here is the proof behind the greater than 85% accuracy claim Elliottician make with confidence. Participants of the Elliottician Certification Course not only get to see the proof in module 14, but also how the forecasts were formulated.

Module 15 - Putting it All Together for Profit: Accessing, Examining and Thoroughly Understanding the Research Results. Use never before published research, which has resulted in the world's largest, most comprehensive collection of Elliott Wave patterns ever compiled.

With access to the entire database of research results, learn how it was carried out, and how to calculate the exact probabilities of market movements. The RET Trader software actually calculates all this for you, but it is important to know what the software is doing behind the scenes so you can better understand how to implement the forecasts into your trading.

Module 16 - Elliottician Speed Test (Intermediate Level): Using Elliottician's proprietary Speed Test software at the next level of difficulty. This will deeply install the patterns in your right brain - for instantaneous recall without effort or thought... leading to instant recognition of opportunities and greater profits... You now start seeing Elliott Wave patterns everywhere...

Module 17 - Continuing With The End In Mind: Revisit the Analysis process in greater detail and depth so you can more fully understand how to apply the principles in your own trading. Now you begin to see the patterns in the chart before the general market... You begin to understand the system and what it is that Rich is actually doing... Your knowledge and understanding about the Refined Elliott Wave Principle by now is increasing exponentially...

Module 18 - Direct Access to the Elliott Research Database: Use Elliottician's proprietary software tool, the Elliott Probability Calculator. With direct access to the Elliott Research Database, simply plug in the details of your incomplete Elliott Wave pattern, and it will immediately tell you the probability of the pattern changing direction. This is a simple yet immensely powerful trading tool. What would it mean to your trading to know the exact probability of how far a trade will go before reversing? Or how about knowing the highest probability Fibonacci retracement level when looking to enter a trade?

Module 19 - Summary of Section One: Go through a closed eye process to help install all you have learnt into your subconscious mind.

Module 20 - Introduction to the RET Trader software: This five part video series gives you everything you need to know to get the very best results from this comprehensive software forecasting package.

Module 21 - Elliottician Speed Test (Advanced Level): Here you will take your

pattern recognition skills to the top level using the Elliottician Speed Test software at the Advanced Level. You will be amazed at how you will be able to quickly glance at a pattern and know exactly what it is, without even thinking about it. You will be one of an elite few who will be able to identify a clear market path where others see only chaos and randomness... and you will be able to do it in the blink of an eye.

Module 22 - Round One Elimination Trials: How to quickly and easily identify which markets you should not be forecasting - so that you can concentrate your trading on markets you can easily forecast accurately. You will analyze actual price charts using the RET Trader software.

Module 23 - Limitations of the RET Trader software: Identifying when you can use the software output with confidence, and when you cannot. This will help you avoid common mistakes some traders make when using this software. In Module 23, Rich clearly illustrates how knowledge of the Refined Elliott Wave Principle plays the major role in your trading success.

Module 24 - through 36: In these modules, Rich will take you through a comprehensive analysis of various indices, stocks, commodities, futures, T-Bonds, Forex and so on using the RET Trader software. You will feel the pure power of being able to predict markets for profit.

Module 37 - Elliottician Speed Test (Guru Level): Using Elliottician's proprietary Speed Test software at the top level of difficulty so as to better install the patterns in your right brain - for instantaneous recall without effort or thought.

Module 38 - 40: In these three modules, Rich explains exactly how to incorporate support and resistance lines as well as the use of candlesticks in your forecasting. **You will as a result make better trading decisions.** He also teaches you more ways to recognise Entry and Exit points - invaluable input for your trading plan.

Module 41 - Review: A review of the course that shows you exactly how far you have come. You are now ready to commence the final certification test, your opportunity to prove to yourself that you are now able to forecast the market direction with greater than 85% accuracy.

Module 42 - through 60 - Extensive Case Studies: Nothing drills in knowledge better than real-life case study after case study... and here you will find no shortage of them. These 20 separate modules relentlessly drive home the critical points in live trading situations. This is done using real world stocks, indices, and commodities. You will be empowered by your newfound ability to instantly recognize what is going on in real-life market situations... which you can then apply for your own *trading profits...*

The ability to forecast how players in the market will act and react will give you the power to forecast markets with **awesome precision**. Not every market... obviously. There is a simple test to determine which markets you can forecast and which ones don't conform.

The **S & P 100 stocks... S & P 500 stocks...** A lot of the **NASDAQ stocks**. High volume or very liquid **commodities, currencies, even bonds**. They can all be forecast with uncanny accuracy ...

The **Elliottician system** is based upon a certain type of **pattern recognition**. It looks for markets that have shown appropriate historical behavior. A number of tests are performed on charts over the past 10 - 15 years to determine whether historically they have shown particular patterns consistently. If the market qualifies, then they can *forecast into the future with a high and proven degree of probability.*

 Right click here & select "Save Target As..." to save this media to your computer.

The **Advanced Elliottician Course** is an online training course. You learn at your own pace at times that suit you from your own computer.

It consists of 30 modules which show you how to combine your forecasting skills with specific technical indicators - including our proprietary **Refined Elliott Oscillator** - to create outstanding trading entry and exit signals.

Other Technical Indicators with Elliott

Learn how we apply Fibonacci, Bollinger Bands, MacD, moving Averages, Volume, Newsfeeds and Candlesticks alongside the Refined Elliott Wave Principle to magnify our trading effectiveness.

Intelligent Trading

Implement an Intelligent Money Management Strategy, Risk Reward Analysis, Use the Money Management Calculator to Set Entry and Exit Points, Put it All Together in an Effective Trading Plan.

Structured Trading Processes

Learn money management, how to trade using entry/exit signals, how to develop a comprehensive workable trading plan to take profits out of the market.

Refined Elliott Oscillator

Learn and receive access to the proprietary *Refined Elliott Oscillator* to determine trade entry and exit points.

Track Record - Elliottician achieved a 95% accuracy on our 2004 calendar year calls...

Learn how the experts, who have developed this world leading technology, apply it to accurately forecast and trade multiple markets (equities, ForEx, commodities) to achieve their results.

The Advanced Elliottician Certification Course includes the following modules:

Module 1 - Course Introduction

Module 2 - Using the Refined Elliott Oscillator with Elliott to Generate Entry Signals

Module 3 - Using Bollinger Bands to Generate Exit Signals

Module 4 - Using Volume as a Powerful Confirmation Tool

CFTC Required Disclaimer

THE TRADING STRATEGIES, SECURITIES, OR PRODUCTS DISCUSSED MAY BE UNSUITABLE FOR INVESTORS DEPENDING UPON THEIR SPECIFIC INVESTMENT OBJECTIVES AND FINANCIAL POSITION. INVESTORS MUST MAKE THEIR OWN INVESTMENT DECISIONS IN LIGHT OF THEIR OWN INVESTMENT OBJECTIVES, RISK PROFILE, AND CIRCUMSTANCES AND USING SUCH INDEPENDENT ADVISORS AS THEY BELIEVE NECESSARY. THEREFORE, THE INFORMATION PROVIDED HEREIN IS NOT INTENDED TO GIVE INVESTORS SPECIFIC ADVICE AS TO WHETHER THEY SHOULD ENGAGE IN A PARTICULAR TRADING STRATEGY OR BUY, SELL, OR HOLD ANY SECURITY OR PRODUCT MENTIONED. IN ADDITION, THE INFORMATION PROVIDED HEREIN HAS BEEN PREPARED SOLELY FOR INFORMATIONAL PURPOSES AND IS NOT AN OFFER TO BUY OR SELL, OR A SOLICITATION OF AN OFFER TO BUY OR SELL, THE SECURITIES OR PRODUCTS MENTIONED OR TO PARTICIPATE IN ANY PARTICULAR TRADING STRATEGY. MARGIN REQUIREMENTS, TAX CONSIDERATIONS, COMMISSIONS, AND OTHER TRANSACTION COSTS MAY SIGNIFICANTLY AFFECT THE ECONOMIC CONSEQUENCES OF THE TRADING STRATEGIES OR TRANSACTIONS DISCUSSED AND INVESTORS SHOULD REVIEW SUCH REQUIREMENTS WITH THEIR OWN LEGAL, TAX AND FINANCIAL ADVISORS. FURTHERMORE, SECURITIES TRADING ENTAILS A NUMBER OF INHERENT RISKS; BEFORE ENGAGING IN SUCH TRADING ACTIVITIES, INVESTORS SHOULD UNDERSTAND THE NATURE AND EXTENT OF THEIR RIGHTS AND OBLIGATIONS AND BE AWARE OF THE RISKS INVOLVED. THE INFORMATION AND DATA PROVIDED HEREIN IS BASED ON INFORMATION GENERALLY AVAILABLE TO THE PUBLIC FROM SOURCES BELIEVED TO BE RELIABLE. NO REPRESENTATION IS MADE THAT IT IS ACCURATE, COMPLETE, OR CURRENT OR THAT ANY RETURNS INDICATED WILL BE ACHIEVED. CERTAIN ASSUMPTIONS HAVE BEEN MADE IN THIS ANALYSIS, WHICH HAVE RESULTED IN PROJECTED RETURNS DETAILED HEREIN. CHANGES TO THE ASSUMPTIONS MAY HAVE A MATERIAL IMPACT ON ANY RETURNS DETAILED. TRANSACTION COSTS ARE ESTIMATED AT \$25.00 PER BUY AND SELL IN THE

CALCULATION OF THE RETURNS. CFTC RULE 4.41: HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. ALSO, SINCE THE TRADES HAVE NOT ACTUALLY BEEN EXECUTED, THE RESULTS MAY HAVE UNDER – OR OVER – COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. WE RECOMMEND THAT YOU SEEK ADVICE FROM YOUR INVESTMENT PROFESSIONAL, WHO WILL VERIFY WHAT IS SUITABLE FOR YOUR PARTICULAR NEEDS AND CIRCUMSTANCES. FAILURE TO SEEK DETAILED PROFESSIONAL PERSONALLY TAILORED ADVICE PRIOR TO ACTING COULD LEAD TO YOU ACTING CONTRARY TO YOUR OWN BEST INTERESTS AND COULD LEAD TO LOSSES OF CAPITAL.
