If you could break the DNA code of a money-making trade... would that put more bucks in your bank?

**** He beat the DOW by 15 times and the NASDAQ by 6 times in 2005... (2,053% and 250.1% in 2004/5) – Now this maverick trader wants to show you:***

How to profile and identify the DNA of a winning trade – and ride it for maximum profit...

**** Also Revealed ****

***His 292 most closely guarded
“Trader Money-Making Secrets...”***

Techniques, tricks, strategies and devices that identify the *precise genetic fingerprint* of **trading money-plays** you can exploit *for maximum profits* ...

* See personal trading results below...

From the Desk of Andrew Baxter, Trader & Licensed Equities and Futures Broker

Friday, 10:25am

Dear Stock Market Trader,

What separates the **winners** from the **losers** in the trading world?

Why do some traders yank **major money** out of the market no matter whether it's up, down, or moving sideways – and do so with total confidence, a cool head and no stress at all... while others continually lose their cool – *and their money* – and find themselves lying awake staring at the ceiling at 3:00am every morning?

If you would have traded only \$10,000 in the market during the past 4 months * - and you knew what I know - you would have walked away with \$17,680... if you put down \$100,000 (or even more when you use someone else's cash) you would have taken home \$176,800 or more...

That's a 76.8% return you can take all the way to the bank ...

That's **15 to 1** better than the DOW, and **6.5 to 1** better than the NASDAQ. In 2004/5 I beat the DOW by **21.5 to 1** (*yes - that 2,053% greater return than the market*). And the NASDAQ by **3.5 to 1** or a **250.1% greater return** ...

I've seen a lot of hungry young traders bite the dust - *and hard* - in my 13 years trading professionally in the market. But I've also seen a lot of savvy and smooth

operators pocket *millions of dollars* ...

Do you know what makes all the difference? Do you think you have what it takes to be on the **winning side of the trade** more times than not ... *a formula guaranteed to make you incredibly rich?*

How to forecast your own financial future...

Do you believe there are **massive amounts of money** to be made in the markets? Do you feel *excited, optimistic* and *pumped* about the potential? Or are you more pessimistic and afraid of the market? Are you a long-term passive investor – or an *active trader* looking for accelerated returns you can control?

My experience in training over 4,000 private traders is that you can very *accurately forecast your own future... it's precisely as you expect it to be*. So if you are expecting great returns, and expect that following a system that has returned *handsome profits* for other traders will do the same for you... then you are ready for the next step ...

Privately, I have revealed to hundreds of successful traders my **Seven Guiding Principles of Trading Success** – and my closely guarded “**Trader Money-Making Secrets**” – all 292 of them.

Each of my students paid \$10,000 for this information, and for good reason ...

After all, what would you pay for the *precise genetic fingerprint* of **trading money-plays** you can turn *into major cash windfalls?*

Recently I packaged all my greatest money making strategies, techniques and tactics into a 4-CD series called “**Mastering the Stock Market**” ...

And today from that series, I will reveal to you three of my **Seven Guiding Principles of Trading Success** and many of my “**Trader Money-Making Secrets**” absolutely FREE ...

But before I do, let me tell you why you should be glued to what I have to say:

13 Years Professionally Trading In The Market

Market Exposure Of US\$750 Million In Past 3 Years

Returns Outstripping the Market by a Factor of 6 times and more...

I have been in markets for 13 years, and over the past three years alone, my retail clients have had, via various instruments and particularly derivatives, an estimated market exposure approaching US\$750 million dollars.

I am a licensed Equities and Futures Broker. I gained my Bachelor of Science Honors degree in business and finance at the University of Bradford Management Centre – one of Europe's leading business schools.

I spent six years on the London Stock Exchange with Henderson Global Investors

Limited and Clerical Medical Investment Group Limited – two of the UK's leading investment houses.

I have trained over 4,000 private traders how to systematize their trading with the objective of being on the **winning side of the trade** more times than not – *my personal formula for getting rich without losing sleep ...*

My personal trading results speak for themselves:

This year, my modified strategies in my number 2 account **have seen returns of 76.8%** from April 20th to August 23rd already - **compared with just 5.1% from the DOW and 11.7% from the NASDAQ**. That is **more than 15 times the return from the DOW** and **6.5 times the return from the NASDAQ** over the same period.

For the 2004/05 financial year (July 2004 - June 2005) my 12-month return was **32.3%**. That is **2,053% better than the DOW return of 1.5%** and **250.1% better than the NASDAQ return of 9.24%** over the same period.

And I have showed countless investors in my **\$10,000 per person seminars** how to achieve impressive results. But rather than blow my own trumpet, allow me to quote what others have said about my **"Mastering the Stock Market"** 4-CD series...

"... a master at teaching techniques to trade the markets in a highly profitable manner"

"He is the real deal – a master at teaching techniques to trade the markets in a highly profitable manner ... and a master at communicating this to others in a systematic and predictable fashion."

—C Jensen, *Licensed Broker, Synergy Investment Group, Dallas, Texas, USA*

"... precisely what every trader needs ... can only lead to one result -- higher returns from the market"

"Congratulations Andrew ... Great product. Well done -- this is precisely what every new trader needs -- and the perfect comprehensive refresh course for every experience trader. It can only lead to one result -- higher returns from the market ..."

— Rich Swannell, *Founder of Refined Elliott Trader, Elliottician LLC, New York, USA*

"Andrew is a genuine market wizard ... he will light a fire under you and move you to a higher trading expertise and higher returns ..."

"I attended every stock market trading and investment seminar available over the past 13 years ... I have listened to local and international experts speak on investing, trading and the markets in general.

"Without question Andrew Baxter rises above them all. He is a master communicator and a skilled interpreter of complicated markets. I rate him as a genuine market wizard – he will light a fire

under you and move you to a higher trading expertise and *higher returns...*

"There are few market educators that deserve your money, your time and your attention, Andrew Baxter is one of them".

—*Stephen Jennings, Author of "Mastering Futures Trading", licensed Futures broker, trader and researcher of trading systems and strategies.*

"My trading skills have improved significantly ..."

Thank you Andrew for an exceptional product. I did not have much expertise in trading stocks until I got your CD-Rom series ... However I am now confident on investing in the market. My trading skills have improved significantly ...

—*Jeff Hynes, CEO Eman Holdings, Hong Kong*

"Investors will be able to fast-track years of study ..."

"*Mastering the Stock Market* by Andrew Baxter is a full library in itself, absolutely fantastic. Investors will be able to fast-track years of study with this high quality superbly presented course."

—*Dr. Ric Lawes, B Bus, MBA, PhD, Bangkok, Thailand*

"Andrew's seven guiding principles took me from novice to profitable trader ..."

"I have been share trading since 1999, starting with no knowledge and looking at where I am now ... a highly profitable trader ...

"I owe a lot of my knowledge and success to Andrew Baxter. He has the gift of bringing a dry subject across to people with a sense of humour and in simple words.

"He is passionate about trading and that makes him a great teacher. I highly recommend to any serious trader to get hold of Andrew's powerful trading 'secrets' ".

—*Ingrid Schaper, Qld, Australia*

"It wasn't until I attended Andrew Baxter's seminars that I started to trade the share market successfully."

"When I started trading, I first studied a Diploma in Technical Analysis and purchased a series of seminars in Stock Market trading. It wasn't until I attended Andrew Baxter's seminars that I started to trade the market successfully. He showed me how to use this knowledge in a practical way.

"Andrew combines his obvious knowledge and experience of the global financial markets with his natural easy going personality. He has the rare ability to both teach and maintain your interest throughout his seminars."

—*James Goodwin, Full-time private trader, Buderim, Australia*

"Best of all Andrew has the track record ... it has been very rewarding."

"Having attended several of Andrew Baxter's sessions I would not hesitate to recommend them very highly to any one with an active interest in shares and trading.

"Andrew's views are meticulously researched with attention to both fundamental and technical factors. He avoids jargon and uses plain language that any one can understand.

"Best of all Andrew has the track record. I have seen him make fully documented recommendations and report results in detail later. To date his track record has been very rewarding."

—Barry Littler, CEO Alleron Investment Management Limited,
Sydney, Australia

Holding a *Profit-Loaded Hand*...

When you know how to **profile and identify the DNA of a winning trade**... you truly do hold a *loaded hand that will pay off handsomely*. In fact, so handsomely it can produce a flow of cash from profitable trades **greater than anything you may have previously experienced**...

What's the secret to holding such money making power in your hands?

When you understand the **Seven Guiding Principles of Trading Success** combined with my "**Trader Money-Making Secrets**" – you will know how to immediately identify, setup, and execute trades that entail controlled risk and *major upside potential*...

The types of massive trades professionals pull off making **hundreds of thousands of dollars per trade – or more ...**

Seven Guiding Principles of Trading Success

Trading Success Guiding Principle #1 Fundamental Overview To Help Identify Likely Sectors

These guiding principles are *real and very much alive* in **major money-play trades** every day – where traders in the know profit big time by following these very *Trading Success Guiding Principles ...*

Let me bring these principles to life for you with some real live examples ... trades I personally have run and *profited from handsomely*...

So let's look at principle #1 ...

Principle #1 is to use fundamental analysis to help identify likely sectors. Oil of course is a great example. I am not a Johnny-come-lately on oil. My publicly documented recommendations to clients on oil go back as far as June of 2004.

What were the fundamentals *back then* that clearly pointed to a highly profitable trade going long on oil?

- The surplus capacity in OPEC was down to about half a million barrels a day against the back drop of global demand which had been surging year on year...
- China's demand alone had increased by probably 1.3 or 1.4 million barrels a day over the last 18 months and continued to grow.
- There was disruption in production in the Middle East and Iraq was still not online at the levels it should be exporting.
- There was political instability in Nigeria – which exports most of its light sweet crude to the US for refining for petrol.

Even though the former Soviet Union and newly independent states have been coming into the mix providing new sources of oil, it has not been enough to meet demand thus the price of oil has been driven up.

How did I use this information to make a ton of money – with the profits still running?

When you know prices are going to move higher you want to put yourself in a position to exploit that price move. The very obvious example was to be long on the oil sector. If you want to trade futures with the underlying commodity being oil – you take a position in light sweet crude contracts. Or you can take a position in specific oil stocks.

One example is with the stock shown below – Woodside Petroleum. I initially put out the recommendation on this trade when oil was around \$40 a barrel.

This trade has seen a 70% to 75% move in the commodity price. This specific play

on Woodside has seen the stock move from \$16.49 to \$33.05 as I write to you.

It's still a live trade and has returned over 100% thus far ... A very healthy return...

Trading Success Guiding Principle #2 Evaluation Of Best Relative Value In Sector

Trading Success Guiding Principle #2 states that once you have identified the sector to trade ... then do an evaluation of relative value within that sector.

Here again oil provides a great example: Once oil was identified as a sector to trade, you then have the delightful task of deciding which oil companies to invest in. *Do you select major key stocks or some of the more speculative smaller companies?*

Fund managers who have large sums of money to invest usually gravitate toward the bigger companies in a sector at the expense of some of the smaller ones. As a result of this a valuation disparity can really kick in.

This is something you as a smaller, more nimble trader can take full advantage of ...

As mentioned above, I had a bullish recommendation in a stock called Woodside Petroleum. This trade has returned over 100% thus far and the profits are still running as I write to you.

But by using my **Trading Success Guiding Principle #2** ... along with many of the **Trader Money-Making Secrets** I reveal in the **"Mastering the Stock Market"** CD series ... I was able to identify smaller players with *even greater returns...*

Oil Search was one such stock. It started the year trading at \$1.70 and is now trading at \$3.70. It has put on a substantial run, and the benefit of being a cheaper stock is that you get a *bigger bang for your buck*.

You're buying a **larger position** and it's more palatable for smaller investors. This stock is a good example of making a play within a sector and looking for something that perhaps is a bit more attractive on a valuation level.

I show you how to do this in the **"Mastering the Stock Market"** 4-CD series.

Look at the trading differential between Woodside Petroleum and Oil Search – The green line at the bottom of the chart represents the margin by which the smaller stock outperformed the larger stock:

Even though the Woodside trade has done impressively well, using **Principle #2** has identified a trade *that has done even better ...*

How much better?

A full 26% better ... By using fundamental analysis to identify the right sector (Principle #1) and then evaluating relative value within that sector (Principle #2) ... **the Oil Search trade outperformed the Woodside trade by 26% ... even though Woodside was already clocking in at a healthy 100%+ return on investment ...**

Trading Success Guiding Principle #3 Technical Analysis For Timing

The third **Trading Success Guiding Principle** I teach is how to use technical analysis for timing. And although I am attempting to show examples of each principle to you in isolation – the truth is *massive leverage* and *massive returns* occur when you understand how to use them altogether.

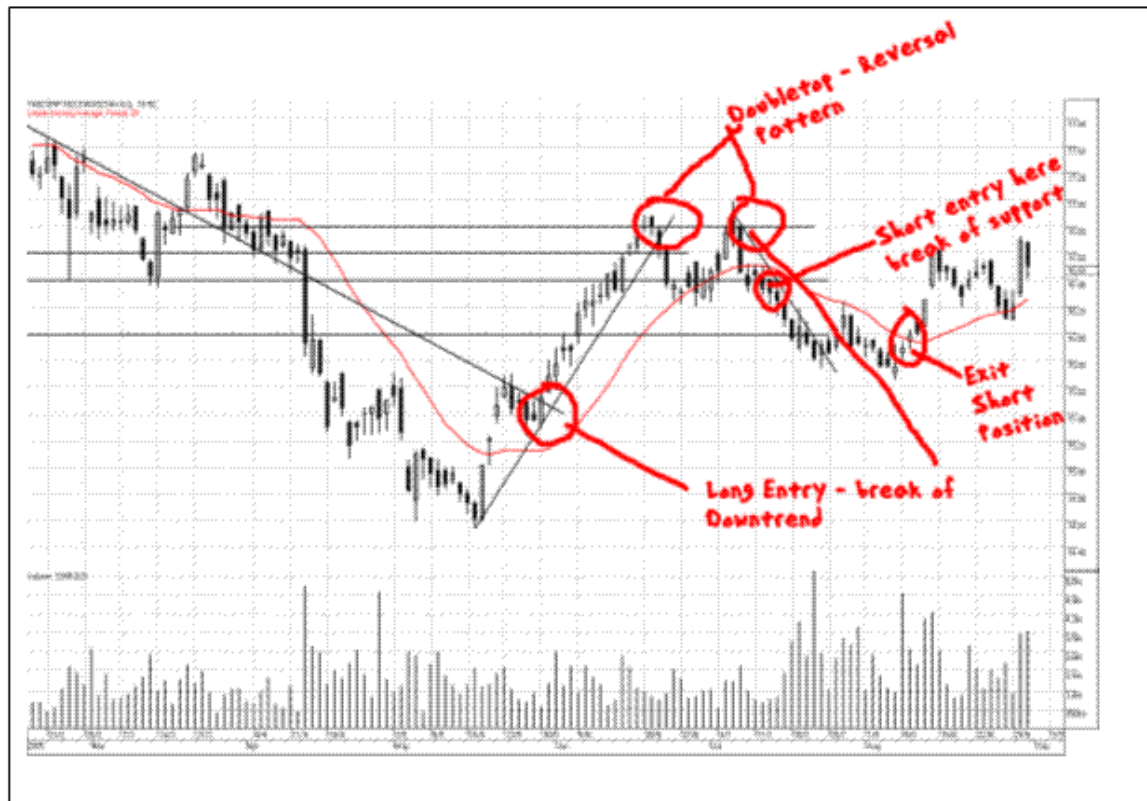

This is what I teach you in the “**Mastering the Stock Market**” series.

In this example we will see how to use technical analysis to get the timing right which allowed me to make money on the downtrend...

Unsophisticated investors or people new to trading think the only way to make money is in a bull market going long on upward trending stocks... **But savvy traders can pull money out of the market when it's trending up, trending down, or moving sideways...**

In this example let me show you a stock called Tabcorp Holdings. They are a gaming

company involved with electronic gaming amongst other things. One of their biggest competitors is International Gaming Technology – which is listed in the NASDAQ.

Follow along with the chart above as I describe how to pick a *highly profitable trade*...

- You can see in the early months of 2005 there is a support level around \$16.80. The stock has come down and touched that level and found it quite hard to fall through.
- It has then regained strength, struggled, then paused before breaking down through the support of \$16.80 – and now it is officially in a down trend.
- We see a break of the down trend around May 30 at \$15.60. The resistance level has been broken, there is strong volume. This is where we buy in for a long position and trade it up.

That's trading the uptrend. How do you use technical analysis to pick the next downtrend and short the stock for additional profits?

- There is a support and resistance level at \$16.80. The formation you see is called a Double Top.

A **Double Top** is one of the biggest reversal plays you see in the market. I cover this extensively in "**Mastering the Stock Market**" because this formation alone is worth a lot of dollars to you – *if you really understand it*... It is one of the biggest and strongest reversal patterns you see in the market place.

- So we have a Double Top here at \$17.00. The stock had a second assault on \$16.80 and didn't break it.

These numbers don't match you say? With a Double Top, generally anything within about 5% of its previous high is consistent with being a Double Top formation. So not breaking \$17.00 is confirmation of the Double Top.

We have a reversal pattern and we are now looking for our entry into a short trade ...

- \$16.40 has been a support level. If the stock falls down through that \$16.40 level, that shows that there's strong weakness in the stock. That would be a confirmation of the reversal pattern and we would expect it to fall further.
- The stock does break through this level and on massive volume. This therefore is our entry level for a short trade on the stock. Massive volume indicates the rest of the market recognizes the trend also.

By getting in early at this point on the downtrend, you're going to make the most money. In fact the downtrend runs from \$16.40 down to around \$15.75. That is not a massive amount of money on it's own (0.65 cents).

But if you short sell with an individual share future... you would pocket \$10 per 1 cent move in the share. Given the 0.65 cent move in the stock, your profit would be \$650 per contract. The initial margin per contract is \$500, **so you pocket a 130% return on investment ...**

Every item in my analysis here is taught in-depth on my "**Mastering the Stock Market**" series ... I cover 292 **Trader Money-Making Secrets** within the seven guiding principles.

With a little practice – and I give you precise instructions on how to *forward* and *back test* your trading abilities before going live in the market – you will soon be calling and making **profitable trades** while controlling any downside risk within precise parameters.

And as you can see from the example above **you don't need big price moves to really profit big time**, especially when you marry the trade with the right instrument.

Technical analysis gives you the precise timing to play the short trade. In hindsight, you can see the rest of the market then also recognized the trade and hence the volume kicked in.

"**Mastering the Stock Market**" covers these and many other highly profitable techniques including how to tightly manage risk with a full 5 hours and 9 minutes of intensive instruction, 262 slides explaining everything you need to know, and 149 charts, diagrams and illustrations to drive home the key trading secrets...

- How to select the equity instruments that are right for you ... (Secrets 254 – 263)
- Discover successful trading strategies you may have been overlooking for years... Detailed are 24 distinct and separate trading strategies ... **plus which**

to use when for maximum profits ... (Secrets 264 – 288)

- How to **manage your position effectively** ... don't fall into the trap of finding and confirming *the most profitable trades* – only to have your profits eaten up by common mistakes in dealing with your stockbroker ... (Secrets 289 – 292)
- **And many more ...**

Many who are new to trading fail to realize that no one trader money-making secret can be taken in isolation. They have to be used together and in co-ordination with the **Seven Guiding Principles of Trading Success**.

What follows is an example of how combining the principles correctly produced a **203% return in 66 days ...** and failing to understand how to combine them would have resulted in a major loss ...

How Combining Principles #1, 2, 3 Delivered a 203% Return in 66 Days...

Here is a great example with the company, COLORADO, who sell leisure apparel – shoes, jeans, belts and casual wear.

I traded this US company in the Australian marketplace. In that country, their equivalent to the Federal Reserve raised interest rates to 5.25% in March 2005. This was an unexpected interest rate rise. Consumer confidence dropped by its highest recorded amount.

With higher interest rates... higher mortgage commitments, one would expect a slowdown in consumer spending, especially on discretionary items. Using such fundamental analysis and an elementary understanding of economics – I selected the sector to focus on.

A closer look within the sector identified COLORADO as a good “short trade”.

In fact, it fell from \$5.70 to \$4.51, a 20% drop. Using leverage instruments as I teach in **“Mastering the Stock Market”** an initial outlay of \$5,700 returned a profit of \$11,599 within 66 days. That is a **203% return within 66 days...**

Now here's the big point I want to make:

If you used only Principles #2 & 3 (quantitative and technical analysis) to make your decision you would have a BUY signal – at \$5.80 there is a break of a downtrend, a higher bottom, a break of resistance and new support.

But Principle #1 – fundamental analysis – clearly indicates you should SELL. This is a critical point – and one I demonstrate over and over in *“Mastering the Stock Market”*. You must use all the **Guiding Principles of Trading Success** together – and when you do, you’ll be on the winning side of the trade more times than not – taking home big gains.

What happens when you don’t? Check it out:

The difference if you bought versus sold the same sized position at \$5.80 – a 203% profit versus an \$8,000 loss ...

Many people new to the stock market and trading find it overwhelming – but it doesn’t have to be... Many new to trading don’t know where to start... This is why I put together *“Mastering the Stock Market”*. It is a structured approach all presented as small baby steps. But once you master all those baby steps and combine them ... ***enormous moneymaking power will be in your hands ...***

You will have the confidence to recognize, execute, and profit from exciting trades *just as the professionals do ...*

How to get your copy of “Mastering the Stock Market”

Order your copy of *“Mastering the Stock Market”* today and discover:

- 1) How to **profile and identify the DNA of a winning trade** ... The NUMBER ONE secret of professional traders that will put you on the **winning side of**

Bonus #1: "Seven Guiding Principles to Trading Success" FREE REPORT

In addition to **Guiding Principles to Trading Success #1, 2 and 3** already discussed... in the BONUS FREE REPORT you will discover:

- How to obtain the analytical data you need to make informed and profitable trading decisions ... *precisely what information should be included* ... and what "data" and sources of information to avoid like the plague ...
- What a **Trading Recommendation Report** should look like ... and what critical data it must include... You'll receive a sample report – the type of report professional traders rely upon daily to make their profitable trading decisions ...
- The simple way to bring overly complicated "economics" down to the **man-in-the-street** common sense level ... forget the realms of data being fed to you by the financial media ... Get a grip on *grass roots economics* in an instant and you'll find them delivering to you *massively profitable trades* ...
- How to use charting to analyze more specific opportunities ... and to fully develop your **trading plan** into a *profit pulling powerhouse* ... THE SECRET – you make the money long before you put your money on the table ... *I'll show you how* ...
- The one **BIG DADDY SECRET** – *the most lucrative yet least understood secret of them all* ... only experienced traders with hundreds of millions of dollars in trading under their belt get this one ...

And you will too ... in fact it will be responsible for putting more dollars in your pocket and saving you untold stress and undue worry than anything else you could ever learn about trading, investing, and the stock market.

Bonus #2: "Seven Steps to Highly Profitable Risk Management" FREE REPORT

One key concept many do not understand is ... **you make more money in the long run by using tightly controlled risk management than you ever would make by picking the next hot winning stock** ...

Sharemarket Institute interviewed me at length on this subject ... and the result is this powerful report filled with countless gold nuggets on how to maximize the dollars you make *and keep* through risk management.

To demonstrate this point, right off-the-bat I reveal to you an incredibly simple but powerful technique and device that for the average trader can ***instantly boost returns – in our example – by 26.1% overnight*** – without changing anything else you are doing.

In addition, you will discover:

- Why up to 90% of traders leave **almost one-third of their potential returns on the table** ... and what simple device can instantly change this to boost your results ... (page 5)

- Why pulling out of a trade early **massively increases your risk in the long run** ... and how to systematize your trading to prevent this common mistake... (page 5)
- The **2-step strategy** to optimizing profitable trades long before you're *caught up in the emotion* of the markets ... (page 5-6)
- The secret to decisive trading ... the truth is – decisive traders **make the big bucks**, while “I’m not so sure” traders end up on the *losing end of the trade* more times than not ... how to ensure you are always **rock-solid and highly profitable** ... (page 5-6)
- Why being “black and white” is essential to stacking up profitable trades and minimizing any losses ... **a 3-step formula for “emotionless” trading that pumps money into your bank account** ... (page 6-8)
- How to avoid the two most dangerous of all emotions as a trader ... *they can easily bankrupt you – and fast!* (page 6-8)
- **A 4-step process** all highly profitable traders use to *run rings around the uniformed players in the market...* allowing them to literally rob them of their money with impunity ... (page 10)
- How to avoid the one **death trap variable** many traders unconsciously introduce into their trading which axiomatically demolishes their results, sucks dry their capital and *splits them out of the market altogether* ... (page 10)
- How to be on a level playing field with the institutional investors ... and which situations open up the door to *beat them hands down to profit handsomely* ... (page 11-12)
- **The ONE MOST CRITICAL FACTOR** that determines the profit you will make from your every trade ... (page 12)
- How to evolve with a trade as it plays out ... in order to lock in profits and open the door *for additional gains* ... (page 12-13)
- The one age-old trading tool that can **multiple your returns** when used correctly ... and **completely destroy them when misused...** (page 15-17)
- **Discover 3 traders’ tools for turning volatility into your friend...** when this “monster of the market” is understood and played right it will *deliver to you massive returns...* (page 18)
- Two ways to **test your trading system before you go live** ... which critical items in your test must be setup correctly ... or you will be *totally misled* producing disastrous results with your *real money* in the markets ... (page 19)
- **And much more ...**
