

Would you like to take the guesswork out of profitably trading the Forex markets?

Do you trade Forex?

Put the brakes on your trading losses today...

Accurate
High-Probability
Forex Forecasts + Disciplined and
Scientifically Sound =
Trading Plan

Increasingly profitable trades, and more of them...

With a * 92% accuracy rate in publicly made calls over the past two years, it's been very difficult to lose money...

** 92% of our publicly made calls over the past two years were accurate...*

Our 2004 published calls – if all acted upon *precisely as and when we called them* had the potential to produce the following trading results:

- **Forex:** Min profit 32%, Max profit 1,215%, **Average profit 445%**

During 2004 we publicly announced and published 60 calls on a variety of financial markets (Forex, commodities, indexes, stocks). Here is what the numbers say:

- **57 out of 60 calls** were profitable
- **The most profitable call on Forex returned 1,215% on margin.** In other words, an investment of \$1,000 on this call *resulted in \$12,150 profit ...*
- Of the 3 calls that were not profitable, the worst losing trade was just 4% - or a worst-case loss of just \$40 on a \$1,000 investment.

From October 2003 to August 2005, our **average return on Forex is +321 pips.**

For 1 standard lot trade that would return \$10 x 321 = \$3,210 for USD base forex pairs - EUR/USD, AUD/USD, GBP/USD. Minus your \$1,000 investment **equals a return of 321%.**

To review our full and complete track record, please [CLICK HERE](#).

From the Desk of Rich Swannell, Founder Refined Elliott Wave Principle

Monday, 6:25pm

Dear Forex Trader,

Did you know that a new trader who starts out with a **\$10,000 to \$100,000** account on average ***loses every penny within 3 – 5 months?*** The higher the leverage, the larger the trades, the less accurate forecasting, money management and risk control employed – the faster the account ***HITS ZERO...***

A sad but sobering statistic...

But this never has to be your story ... and here's why:

Being profitable at trading – consistently scoring high probability trades – is all about tilting the “Law of Probability” in your favor.

And this is precisely what you do when you combine **Accurate High-Probability Forex Forecasts** with a **Disciplined and Scientifically Sound Trading Plan** – the result of which will be ***increasingly profitable trades, and more of them...***

Our new **ForexWeatherForecast.com** service – based upon 15 years of developing sophisticated forecasting and trading software tools that have a *proven track record of 92% accuracy rate in publicly made calls over the past two years* – will provide you with:

- **Accurate, high-probability Forex forecasts, received daily ...**
Applicable for all trading timeframes including over the next few days, next few weeks, next few months, and over the next year...
- **Prepared by our expert in-house analysts...**
Who scored a 92% rate of accuracy in their publicly made calls over the past two years...
- **Using the world's largest pattern recognition database...**
The only pattern recognition database based upon millions of real world market movements with a proven capability of *uncanny forecasting accuracy...*
- **And the most sophisticated forecasting software...**
Which compares real live data with the millions of possibilities, performs complex statistical calculations then predicts the most probable *time-and-price* outcome for an incomplete pattern...

PLUS AS A BONUS you will receive:

- **A DISCIPLINED TRADING PLAN with scientifically sound trading tactics, money management and risk control...**
You will receive our comprehensive blueprint **TRADING PLAN CHECKLISTS** with risk and money management techniques, which

outline step-by-step how to turn remarkably accurate *time-and-price* forecasts into ***profitable trades...***

And with your 30-day trial subscription to **ForexWeatherForecast.com** service we provide you with a self-proving and self-verifying system to monitor its' accuracy and the potential profitability of your resulting trades.

Professional Traders Agree:

Adeh Mirzakhani, fund manager and President of MG Exchange, Inc. states:

**"Profits have improved thanks to
ForexWeatherForecast.com..."**

"The profits we have returned for ourselves and our clients over the past year have improved since we decided to include the FOREX forecasts from ForexWeatherForecast's RET Trader software along with our in-house proprietary FOREX trading strategy.

"These two tools combined have helped us forecast the markets with greater accuracy resulting in very happy clients."

-- *Vic Spencer, CA, USA*

How do we create “Accurate High-Probability Forex Forecasts” – and just how accurate are they?

Our in-house expert analysts use the **Refined Elliott Trader (RET)** software – powered by the world’s only **pattern recognition database** based on millions of real world market movements – which gives you the *exact odds*, or an **exact probability**, of where the markets are likely to move ...

RET Trader is the result of over \$10 million and 15 years of research into the effective application of pattern recognition – **RET Trader** is used to successfully forecast liquid financial markets such as stocks, currencies, indices and commodities.

In the above EUR/USD example, **RET Trader** helps our analysts identify what possible incomplete trading pattern is occurring, and what is the probability that the market will complete the pattern that it has recognized?

It indicates trading date ranges to study in greater depth, and provides the price and volume information that point toward a certain high-probability outcome. Additional

indicators such as the Refined Elliott Oscillator (REO) can confirm the outlook provided by the **RET Trader** analysis.

RET Trader has been responsible for our in-house analysts scoring a **92% rate of accuracy** in their publicly made calls over the past two years. Recently, **RET Trader** was pulled from the general market and is now only available to institutional users starting at \$100,000 per year...

*However, you don't need **RET Trader** nor do you need to be an expert analyst doing forecasting when you have our in-house expert analysts doing it for you on a daily basis...*

Why RET Trader can forecast with uncanny accuracy...

It has taken 15 years of intensive research and development to reach this point. However, with **RET Trader** and our unique in-house expertise we have achieved far more than was ever imagined possible:

- **Being able to accurately forecast liquid markets with amazing accuracy** (92% of our published calls over the past 2 years have been correct) ...

Thanks to years of number crunching using the computing power of over 3,000 machines strung together in a virtual network which revealed that "common" Elliott Wave patterns are not that common...

They change shape depending on the type of market – commodities, Forex, stocks, indices – and depending on the time frame – over a year versus a day versus an hour.

The result is the world's only pattern recognition database based on millions of real world market movements.

- **Developing the forecasting software and tools that made this possible**, and making that technology available to *thousands of traders*...

*Our **RET Trader** software compares real live data with the millions of possibilities from the database, performs complex statistical calculations presenting you with the most probable outcome for an incomplete pattern.*

All without you having to do one single calculation.

This is the software we have used to achieve a 92% rate of accuracy over the past 2 years, and what thousands of traders are now also using...

- **Creating comprehensive training – turning experienced traders into expert analysts on *pattern recognition, forecasting and trading* ...** no longer available to the public, but used in-house – our Elliottician Certification Course and Advanced Course include over 80 online modules of training complete with audio, video demonstrations, chart examples and self-test evaluations that must be passed in order to progress ...

Almost 1,000 traders enrolled in the Elliottician Certification Course ... and all graduates passed the 85% or greater forecasting accuracy test ... And we continue to use these training tools in-house...

Want more details on why RET Trader is so powerful in hands of our forecasting analysts... and what technology is behind our 92% rate of accuracy track record?

Link to POP-UP WINDOW

What “Accurate High-Probability Forex Forecasts” can do for you and your trading results...

The ability to forecast how players in the market will act and react will give us the *power to forecast markets* with **awesome precision**. Not every market... obviously. There is a simple test to determine which markets we can forecast and which ones don't conform.

However, Forex is definitely a market that can be accurately forecast. It is a high volume market... and a high liquidity market. These are the hallmarks of a market that can all be forecast *with uncanny accuracy* ...

With **Accurate High-Probability Forex Forecasts** on your side, you will:

- Quickly determine your **EXACT probability of success**, in any trading situation, so that you can *find winning trades more easily*...
- Easily determine which trades are potentially profitably, and which are not. This could **ELIMINATE MOST OF YOUR LOSSES**, right there... Period.
- **Know when to enter the market** and when not to. It is one thing to recognize a price pattern; it is quite another thing to know when to enter the market. Our simple-to-implement strategies can **significantly boost your trading profits**...
- **Maximize your profits by not exiting before the run is over**. Most traders throw profits away by exiting too soon. Our proprietary algorithms forecast using our massive pattern recognition database that will allow you to easily and quickly **determine the most profitable time to exit a market**...

ForexWeatherForecast.com focuses solely on foreign exchange. Foreign exchange is a **\$1.5 trillion dollar a day market**. Forex accounts for 50% of all trading on all markets. And it exhibits stronger trends than any other market, which makes it the ideal market to forecast accurately.

And you can dramatically improve the *accuracy* and *profitability* of your trading when you have **Accurate High-Probability Forex Forecasts** produced by our in-house analysts using the **RET Trader** software.

It has been proven time and time again in a public forum – **92% accuracy rate in publicly made calls over the past two years**. **RET Trader software** in the hands of our expert in-house analysts is a powerful combination.

And when you combine the **ForexWeatherForecast.com** daily forecasts with a *disciplined and scientifically sound trading plan* (which you receive as a bonus for signing up for a 30-day trial subscription)...

The result is: **Greater accuracy, increased trading profits, less stress and all the follow-on benefits of making more money more often.**

**“The majors calls are very accurate ...
I have made money on the EURO
calls...”**

I receive your daily FX 8 forecasts - the trade calls are of a very high quality not only in giving you a feel for the direction of the next trade over the night / day, but for the week and the bigger picture for the month[s] ahead.

The majors calls are very accurate and it is so important to have the alternative count and levels where the calls are wrong.

I have made money on the EURO calls - the day of the ECB rate announcement. I have also had positions held and have increased positions in the GBP, AUD, CAD and EURO based on your forecasts.

--Richard Goers, Westpac Banking Corporation, Sydney, Australia

- CADJPY - Canadian Dollar Yen cross
- CHFJPY - Swiss Franc Yen cross
- EURAUD - Euro Australian Dollar cross
- EURCAD - Euro Canadian Dollar cross
- EURCHF - Euro Swiss Franc cross
- GBPCHF - British Pound Swiss Franc cross

Foreign exchange represents **over 50% of all active trades** made on a daily basis. And the above currencies and cross rates **represent over 80% of all Forex traded.**

Trade Your Way to Financial Freedom

If that is your goal... you must start with a plan, a system, and a way to execute. **ForexWeatherForecast.com** provides you with daily forecasts with proven accuracy.

Forecasts are provided with **time and price projections.**

Forecasts are stated with a **statistical probability of occurrence.**

And all forecasts are based upon the world's most extensive **pattern recognition database** built upon millions of real world market movements and 15 years of development in analysis techniques carried out by our **RET Trader** software.

Forecasts are presented in a simple “weather forecast” format making them extremely easy to follow. They include projections for very short, short, medium and long-term trading timeframes.

Today's Elliottician Calls by Elliottician.com

Euro Forecast: Fri Friday, 18 September 2008

Next Few Days

 Sunny
 Expect a short term rally

The Euro has dropped to 1.2200 exactly as forecast earlier this week.
 Expect a short term rally over the next few days. This rally may extend longer than a few days.

Next Few Weeks

 Cloudy
 Expect a low above 1.2100 before a strong rally

Expect the market to swing low anytime now – although it could be as low as 1.2100. Note that there is support at around 1.2170.

Next Few Months

 Sunny
 Rally to 1.3150 or above

Expect a rally to at least 1.3150.

Next 6 to 12 Months

 Light Snow
 Drift back to at least 1.2700

Expect a drop to less than 1.2700, more probably 1.2600 or lower.

This service uses our **Refined Elliott Trader** software market forecasting pattern recognition technology to produce these market forecasts. Like a weather report, it is not expected to be exact. No forecasting system is infallible. Financial market forecasting, like weather forecasting, is a game of probabilities. This service delivers to you the most probable future market movement according to the patterns found in the price, time and volume data. For more information about the unique and proprietary technology behind these forecasts, see www.elliottician.com.

Time to CONNECT THE DOTS...

**Accurate
High-Probability
Forex Forecasts** **+** **Disciplined and
Scientifically Sound
Trading Plan** **=**

Greater trading profits for you ...

When you combine **accurate Forex forecasts** with a **disciplined trading plan** complete with scientifically sound trading tactics, money management and risk control... everything comes together.

We know the trading game is all about **results... PROFITABLE TRADING RESULTS...**

What you need in addition to accurate Forex forecasts is a very clear-cut way to use those forecasts to score the trading results you are looking for the majority of the time.

You know full well that **accurate forecasts** are only half the equation. **Accurate Forecast + Uncertain Action = Uncertain Result...**

Unless you know the best way to trade using those forecasts, there is still a great uncertainty as to your final trading outcome, and you will not produce the results you want and need on a consistent basis.

What you need is:

THE FULL "HOW TO TURN A PROFITABLE TRADE" FORMULA...

You need **Accurate Forecast + Certain Action = Certainty of Result...**

And as a very **SPECIAL BONUS** with your 30-day trial subscription to **ForexWeatherForecast.com** you will receive our comprehensive blueprint **TRADING PLAN CHECKLISTS** with risk and money management techniques...

...which outlines for you step-by-step how to turn remarkably accurate *time-and-price* forecasts into **profitable trades...**

The **"ForexWeatherForecast Trading Plan Checklists"** will show you a structured trading process. You will learn all about **money management**, how to trade using **entry exit signals** and how to put into action a **comprehensive workable trading plan** to take profits out of the market.

In the **"ForexWeatherForecast Trading Plan Checklists"** you will discover:

- When to enter a trade and when to stay on the sidelines. You will receive our **20-Point Trade Entry Checklist** which covers every conceivable indicator you need to ensure your profitable success...

This disciplined and orderly approach to entering a trade helps remove emotion from the equation. You can then enter a trade with confidence knowing you haven't forgotten something important that could lead to disaster.

- How to customize the **Trade Entry Checklist** to suit your personal trading profile... You must factor in your risk profile and risk tolerance levels... Can sleep at night without worry? ...And how easily do you adapt in an environment of constant change?
- Once in a trade, our **20-Point Trade Management Checklist** will guide you in **managing an open position** in the market... ensuring that you **manage risk** but don't cut short profit opportunities... especially focusing on keeping high emotions out of the game – so often a traders downfall when real money is involved...
- 12 critical **Money Management Rules Checklist** that allow you to run with profitable trades, cut bad trades off at the pass and manage your overall liquidity position...
- 8 strategies for employing the stop loss to preserve your hard earned capital while locking in profits on open positions... our **Stop Loss Checklist** also covers **3 “must do” strategies** and **2 “never try this with your own money”** traps to avoid...

Plus much more... including **psychological factors** that can make you or break you... how to keep a **Trading Diary** and why it is so valuable... plus **damage control** – how to kick it into action but more importantly – what to do to ensure you never need it...

“Your levels on all eight-currency pairs were incredibly accurate. I know I could have made money trading using your numbers.”

-- Gerald Zgodinski, State, Country

[CLICK HERE to Sign-Up for your 30-Day Trial NOW...](#)

If all your trades were based upon forecasts with clear time and price projections... along with a precisely defined probability of occurrence...

What would that do for your trading results?

As a trader you may have developed your own trading system – with various indicators you use. I am sure you have experienced the uncomfortable situation where your indicators are saying to get in and the market goes in an entirely different direction. Such a situation can be very costly...

The beauty of the **ForexWeatherForecast.com** service is that you get a *time and price* projection along with a *statistical probability of occurrence*. And better yet... the accuracy of these calls has been **92% over the past two years on all publicly made calls...**

So as a trader you can use **ForexWeatherForecast.com** as a filter to use with your own trading system – and only enter the market when your indicators line up with the **ForexWeatherForecast.com**

That would increase your success odds *many times over...* You may find yourself scoring winners twice as often, or more. And it will definitely reduce your stress levels.

An honest admission about forecasting accuracy...

Unlike other forecasting services, we commit to what is going to happen – with a definite **time** and **price** projection with a definite **probability of occurring**.

In some cases there is more than one possible outcome. In that case we state the specific conditions that will lead to definite outcomes – again, with a specific probability of occurring.

No hypotheticals – only specific and definite forecasts you can profitably act upon in your trading...

Are 100% of our forecasts correct?

No, they are not always correct.

All forecasts are stated with a probability of occurring. If there is a 80% probability of occurring, 2 times out of 10 it won't happen. That level of confidence will definitely lead you to more profitable trading.

Sometimes targets are overshoot, or happen before or after the target date. For example, recently I was in a short position in the EURO. We forecast that the market would drop over the next month or two. However, it has happened within a couple of weeks. So I ended up making money faster than our own forecast predicted...

And sometimes forecasts don't pan out at all. In the past 2 years that only occurred 8% of the time...

How to prove and verify for yourself...

Sign up for a 30-day trial of **ForexWeatherForecast.com**. During the 30-day trial, run paper trades on the forecasts provided and track your own results.

Furthermore, we will publish our own daily trading results, which are based upon the same forecasts you will be receiving. These trading results will be emailed to you each day... and you will see for yourself the handsome profits made if you had traded based upon the forecasts received from **ForexWeatherForecast.com**.

It is a self-proving and self-verifying system...

A sample of our EUR/USD forecasts and the subsequent results is show below – you will receive the same tracking daily on our EUR/USD, GBP/USD, USD/CHF, USD/JPY, AUD/USD, USD/CAN forecasts... and more.

Track Record: Forecast Results for the EUR/USD <small>by Elliottician.com</small>								
Forecast Date	Next Few Days		Next Few Weeks		Next Few Months		Next Year	
	Forecast	Results	Forecast	Results	Forecast	Results	Forecast	Results
1 Nov 05	 Partly Cloudy Expect the market to rally to 1.2010 to 1.2080 range the next day or so, with 1.2040 providing resistance	 Market swung high at 1.2084 the following day						
2 Nov 05	 Rain Expect the market to move below 1.1920	 Market broke below 1.1920 two days later, and continued to move down						
3 Nov 05	 Rain Short rally no higher than 1.2130 before a move below 1.1920	 Short rally to 1.1995 before breaking down						
4 Nov 05	 Rain Could have a slight retracement upwards, but the market is expected to move below 1.1920 if support levels are broken	 Market fell sharply below 1.1920						

"You've mastered this market at a level far superior to anyone..."

What would be required to convince you to continue this excellent service (forecasting EUR/USD)? ... You've mastered this market at a level far superior to anyone.

"The calls have been amazingly accurate..."

This is a fantastic service. I just love these calls that have been coming in every night. They have been amazingly accurate. They are really helping me with the RET software. Thank you so much.

-- Johanna O'Reilly, Australia

More testimonials from users of **RET Trader Software**, the system our expert analysts use to make our Forex forecasts:

"...claims of 85% accuracy are achievable..."

"...perhaps as close to the "Holy Grail" of trading as you can reasonably approach. I have proven to myself with a list of verifiable witnesses that claims of 85% accuracy are achievable and a MODEST assessment of performance at that."

-- Ran Edwards, TN, USA

"RET ... is the closest thing to a crystal ball..."

"It's almost certain suicide if you go it alone and unarmed into the markets. RET is my Obi-Wan Kenobi. With RET ... you're not only less likely to get blindsided by market action, but you've finally got the closest thing to a crystal ball."

--*Sam Bleecker, New Jersey, USA*

"I am very confident in my trading..."

"Before I was part of the uninformed crowd that lost a fortune in trading stocks. After devoted studying of technical analysis, the Elliott Wave Principle, and the great help of the RET, I am very confident in my trading."

--*George Hinis, Cyprus*

"It identifies risk..."

"I have been using the software for a few months now and I am impressed with the ability to identify risk. The tool is very well designed, easy to learn, and very accurate."

--*Jim Hoskins, USA*

"I was paralyzed by a lack of criteria with which to choose, even tentatively, between different counts..."

"Understanding that the validity of different scenarios / counts was a matter of probability gave me the ability to commit to choices. In the past, I was paralyzed by a lack of criteria with which to choose, even tentatively, between different counts or scenarios."

--*Bob Tajima, Junction City, California, USA*

"For anyone who wants to be a successful trader, it's an absolute must."

"Cheap at the price you are asking. For anyone who wants to be a successful trader, it's an absolute must."

--*Darwin Harris, Renton, Washington, USA*

"... Premise is the clearest one I have come across in my 7 years of research..."

"I think the premise is the clearest one I have come across in my 7 years of research, I think wave theory is applicable, and I think you have come across a great way to use it with your data base and research."

--Bruce Bell, New York, New York, USA

"Where before there was darkness, now there is light..."

"I have learnt that it is ALL possible. Plain and simple. The capabilities of my trading are now boundless. Where before there was darkness, now there is light. It is possible to change your life, the lives of those around you and the lives of those you don't even know through the proper application of this technology."

--Trevor Cowie, Winnipeg, Manitoba, Canada

"The best investment I've made in all 31 years of my life..."

"It's the best investment I've made in all 31 years of my life. No other trading system comes close to it. It's worth every penny if not more."

--Philip Rodgers, New York, USA

"Awesome results... Awesome expectations... Thanks a million..."

--Norman Alderton, USA

"Superior technical analysis..."

"The product uses superior technical analysis software. It's an all in one product. It's simple to use, even for a beginner."

--Jonathan Ravelas, Muntinlupa City, Philippines

How and why pattern recognition works to provide your trading profits with a boost...

How You Can Use Crowd Behavior to Forecast Financial Markets

How many times have you been frustrated by trading losses? How often have you bought a stock, commodity or Forex, only to see it head in the opposite direction to what you hoped?

If this is your experience, we have good news for you...

What if we told you that certain stocks, commodities, futures, indices and currencies react to crowd psychology...***would you believe us?***

If you could see clear evidence showing you exactly which equities have conformed to this behavior in the past, would that convince you that you might be on to something big? ***Would you want to know more about it?***

How would you like to learn a practical, easy to use, trading technique that will turn you into a highly profitable, world-class trader?

Elliottician is dedicated to helping traders achieve consistent success.

Let us explain...

Imagine, for a moment, that you are in a large football stadium with 100,000 other stock market traders. Everyone is watching the scoreboard as the price of a particular stock moves down. Then, as you watch, the price starts to rise.

All around you, traders are observing the same price movement. Throughout the stadium are short-term, medium-term, and long-term traders. There are private traders, technical traders, fundamental traders, institutional traders, traders who want to buy, traders who are holding, traders who want to sell, and traders who are not in the market all – the whole gamut.

And as the price starts to move upwards, different traders react in different ways. Some immediately get on their cell phone and call their broker. Other traders wait and see, while others are not even interested.

As the price continues to move up, many traders within the crowd will place orders with their brokers. All traders are watching the same price movement, but there are many different reactions.

It is impossible to predict what a single trader in the stadium is going to do, but quite easy to predict the actions of a crowd.

You start to notice that the action of the traders affects the price. And then the traders react to that new change in price – the very same change that they inadvertently created. And so the cycle continues...

The net result is price movement that moves in patterns – regular, definable, predictable patterns.

Now, admittedly there is no stadium of 100,000 traders. But the traders are real enough. They are spread around the world in homes and offices watching their computer screens as the prices change. The result is the same – wherever there is a crowd of traders watching the same price movement, there will be the same price patterns – the result of crowd behavior – the result of mass human psychology.

We at Elliottician have the ability to identify patterns caused by the impact of a crowd trading the same market.

Most liquid markets (those traded or directly affected by a large crowd of traders, such as Microsoft shares, the S&P500 Index or currencies) are very predictable to those of us that understand this forecasting technology.

Remember, although it is nearly impossible to determine what a single trader will do, it is statistically possible to determine the probability of what a large crowd will do.

If you are able to understand the effect a large crowd will have on a liquid market, you have the ability to accurately predict its direction. It's that simple.

For many years we have been developing the world's first and only database of its type that measures the impact that crowds of traders have on stock and commodity markets. This has been a lifelong quest and one that we now wish to share with you.

This is no theoretical exercise – for years we have had the help of thousands of people who have donated their unused computer time to help in the analysis of millions of charts from the world's most traded markets.

Proprietary Research

Just like a weather forecast, our Elliott Wave Pattern Recognition technology gives you the exact probability of the market reaching a given price by a given time. Although it doesn't tell you what to buy or sell, or when, it does give you incredibly valuable information that you can use to make your own trading system more profitable.

Imagine knowing that your favorite stock has an 81% chance of rising 50% in the next 7 days.

For example, imagine knowing that your favorite stock has an 81% chance of rising 50% in the next 7 days. Compare this to the weather forecast metaphor - such as knowing that there is an 81% chance of strong winds today. With such information, you could decide whether to pull out your kite, go sailing or simply stay indoors. It is your decision entirely what you do with this information - it simply allows you to make better, more informed, choices.

When applied to the stock markets, this valuable information enables you to take more money out of the market, regardless of your trading system.

Most of our clients use Elliott Wave Pattern Recognition technology as an additional indicator to their favorite trading system - to make their existing trading system significantly more profitable.

How Elliott Wave Pattern Recognition is used to forecast the markets

When a large number of traders are watching the same price of a given market, they tend to act in predictable ways - similar to a herd instinct. The human psychology translates into remarkably predictable price movements, or patterns.

Using pattern recognition to forecast the market is simply a matter of identifying the beginning of a common price pattern, then determining where the pattern is most likely to complete.

Here is an example:

A typical Elliott Wave "Impulse" Pattern

The figure above represents a five-wave ascending "Impulse" pattern (highlighted in magenta) - one of a dozen fundamental Elliott Wave patterns.

An Impulse pattern moves in the direction of the underlying trend and is made up of five waves, or moves. Each wave is labeled at its endpoint. The Elliott Wave Principle identifies an Impulse wave when:

1. Wave 2 does not fall below the starting price of wave 1.

2. Wave 3 is not the shortest wave by price movement when compared to wave 1 and wave 5.
3. Wave 4 does not overlap the range of wave 1.

Once this 5 wave pattern is complete, the market will generally retrace (drop back in price) somewhere between 1% and 100% of its climb, before continuing with the larger trend. As you can see in the above example, the retracement has already started at the far right of the chart.

How the exact probabilities are determined

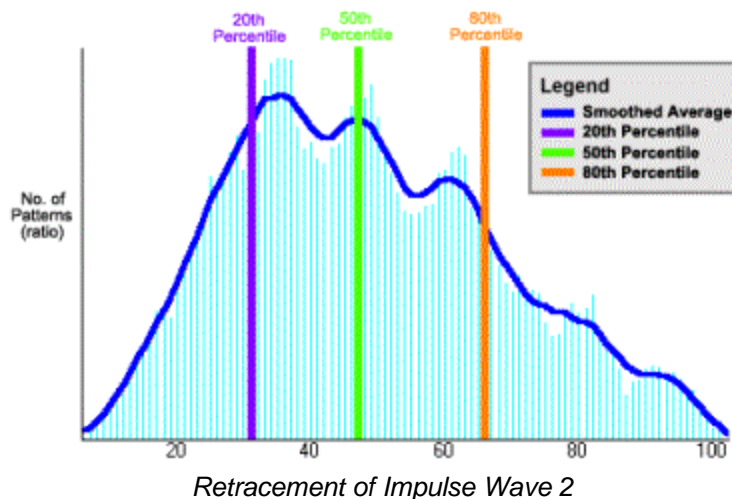

Once a pattern has been identified, as demonstrated in the above diagram, the next and most important question is: "Where is the market likely to be when the pattern completes?"

To answer this, we set out to examine a large number of such patterns with the aim of determining, by statistical analysis, where the patterns most often completed.

Because pattern recognition takes a large amount of computing power, we created a screen saver to do the work. Thousands of people have donated their unused computer time for several years, resulting in the establishment of the world's largest Elliott Wave database.

Our database has yielded secrets about the market that have never before been available to traders.

Below you can see the results of the analysis of the millions of Elliott Wave patterns found in our Elliott Wave Database. When every 5-step Impulsive pattern of this type in our Elliott Wave database is examined, and the frequency of retracement between 1% and 100% is graphed, we find results that look like this:

As you can see from this frequency histogram, the most common retracement is about 38%, followed by 50%, and then 62%.

Note also that 60% of patterns retrace between about 32% and 65% of the initial five-wave price movement before changing direction and resuming their upward movement.

In addition, we have discovered patterns retrace by different amounts (on average) depending on the type of market, the time frame and the orientation. I.e., Patterns covering a small time frame, such as minutes or hours, will behave quite differently to patterns covering months or years.

If you were trading the market in the example above, you can know the exact probability of the market retracing to a given price before changing direction to the upside.

In a similar way, the timing of this change in direction can also be calculated using our New Elliott Wave Pattern Recognition technology.

Question: So what does this mean for you?

Answer: Speculation is now a thing of the past.

It's a fact: 95% of traders lose money, 3% break even, and the other 2% make all the money, and more, than the 95% lose combined.

We have personally purchased, dissected and studied nearly every trading system obtainable. We have spent a fortune purchasing trading systems, and years of computer programming to determine each one's profitability.

Why?

So that neither you nor we ever have to suffer the losses and frustrations again.

We have found that many trading systems can show consistent theoretical profits, but fail to perform when applied to real markets.

We have now been researching and developing the Elliott Wave method of price pattern recognition for more than a decade now – a trading technology that can help you eliminate the frustrations and losses that many traders face every day.

Thus using the **ForexWeatherForecast.com** service based upon our sophisticated forecasting software tools in the hands of our expert analysts can help make trading a lot more profitable for you.

Forecasting the markets has never been this accurate...

What is the Refined Elliott Wave Principle? Why it has been responsible for our 92% accuracy rate in making calls over the past 2 years...

Since 1994, **Elliottician** has undertaken groundbreaking research into the **real-life application of traditional Elliott Wave theory**. This research expands on the works of both Ralph Nelson Elliott during the late 1920s and of Robert Prechter of Elliott Wave International, author of Conquer the Crash.

In mid 2003, after many years of extensive experimentation, Elliottician made a **breakthrough discovery**. We discovered that certain techniques, when applied consistently, produced far superior forecasting results - accurately forecasting market direction over 85% of the time... These breakthrough techniques are called the "**Refined Elliott Wave Principle**" - a **major discovery** and advance upon original Elliott Wave theory.

Using the computing power of more than 3,000 machines, Elliottician has carried out comprehensive research on the original Elliott Wave theory.

The Elliottician research team compiled the world's largest ever database of **real market** Elliott Wave patterns. For the first time since R.N. Elliott discovered the Elliott Wave principle, computer power has been used to comprehensively and statistically analyze hundreds of thousands of charts and millions of Elliott Wave patterns.

For the most part, the research has validated the original Elliott Wave theory. However, there have been some surprising and valuable discoveries that have led to more accurate and reliable forecasting than ever before. The result is a cleaner more "**Refined**" Elliott Wave Principle.

For example, pattern differences between exchanges and countries have now been thoroughly documented, so that the software can tweak its pattern recognition depending on the particular market being analyzed.

The result – a progressively more accurate forecasting system, superior to anything ever seen in technical analysis.

Armed with the comprehensive statistics available in our Elliott Wave pattern database, the Elliottician research team developed the **Refined Elliott Trader** software.

As you can read about in the next section, the **Refined Elliott Trader** software package helps you identify patterns within price data. When it finds an incomplete pattern, it gives you exact odds, or an exact probability, of where the market is about to move. It's like a weather forecast for the markets.

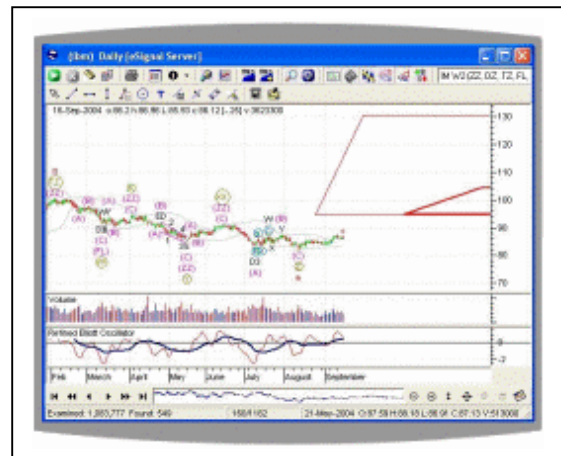

The Refined Elliott Trader software proven results ... and how the forecasts of our analysts using RET Trader software will impact your day-to-day forecasting and trading the markets...

RET Trader Software

The **Refined Elliott Trader (RET)** software – powered by the world’s only **pattern recognition database** based on millions of real world market movements – gives the *exact odds*, or an **exact probability**, of where the markets are likely to move ...

The result of over \$10 million and 15 years of research into the effective application of Elliott Wave – **RET** is used to successfully forecast liquid financial markets such as stocks, currencies, indices and commodities.

In addition, proprietary and applied trading indicators within **RET** may then be used to accurately identify and determine entry and exit points.

RET is designed to drastically improve trading performance for institutional fund managers through to private traders and investors.

RET Trader is a proven performer...

RET Trader is the technology we use to achieved a **92% accuracy rate in publicly made calls over the past two years**. It uses historical market data, not theory to generate its forecasts. It then provides forecasts with a statistical probability of occurring with price and time completion.

What RET Trader software can do for you...

- The database that powers **RET Trader** software is “**the Google of financial market data**” and it works on *real market data* not theoretical pattern movements – which will allow you to perform **instant analysis with unmatched accuracy...**
- **RET** takes the enormous complexities of the financial markets and filters them down to a **scientifically sound forecast of the most probably completion of a pattern** in the market with regards to *time and price...*
- **RET** provides actual forecasts with statistical probabilities of price and time target completions ... giving you more accurate trading entry and exits which will ultimately lead to an **increase in your trading profits...**
